Wholesale Catalogue for Nurserymen, Florists, Dealers and Landscape Architects
Middlebury, Ind.
FOREWORD

“For those who realize the value of quality.”

For twenty seven years—ever since The Krider Nurseries were established it has been our wish that all our friends and customers might visit our nursery and that we might show you the home of the flowering and fruiting stock that is being sent you under our labels.

Thousands do visit our nursery and we extend to all of you an invitation to drive in. Pavements and the Auto bring us closer to you each season. Our latch string is always out and a cordial welcome awaits you.

But such a trip being impractical to the vast majority of you we are doing the next best thing; we are sending you facsimiles of the fruit and flowers we grow. We are presenting you a catalog which not only brings form and color to your vision, but those more subtle qualities—the appetizing plumpness of the apple, the luscious quality of the peach, the juiciness of the berry, and the glorious shadings of the colorful rose. In all respects save perfume—and by the grace of the imagination you may have even that in these pages—you have in this catalog a literal presentation of what your garden and orchard may produce from our stock.

It is only by a comparison of the hardy, thrifty, sure to bear stock with weak inferior plants that will dwindle and pine away and finally “peter out” that you can be convinced of the meaning of the phrase. “For those who realize the value of quality.”

It means success instead of failure, it means satisfaction instead of disappointment. It means the joy of achievement and Success, whether it be a rose, a rock garden or a whole orchard.

Krider’s Hardy Northern grown true-to-name stock will please you. The best is none too good. Don’t waste years of time on inferior stock when just a few cents means the difference between vigor and weakness.

For twenty seven years we have served you. We have grown from small to big. Our vigorous stock has undoubtedly appealed to you or you would not have re-ordered again and again as many or our old customers do from year to year. You have told others, our best advertisement.

Look over our prices. They are as low as good stock can sell for and higher prices can buy no better quality.

Order abundantly today, with eye to future need, that you and yours may harvest with both pleasure and profit.

GUARANTEE

The Krider Nursery Co., Inc. guarantee that each plant, shrub and tree shall be of a size and quality as shown in this catalog and that it will reach customer in good growing condition. The company will replace free of charge any stock not in good condition when it reaches customer upon receipt of freight or express bill properly signed by the agent with a notation of the loss or damage entered thereon. This offer does not apply to parcel post shipments.

The company further agrees to replace at one-half regular catalog price any shrub or tree dying during the first year after planting provided written report is made before October 1st following date of purchase.

The company further guarantees that every plant, shrub, or tree is true to name and will replace free of charge or refund purchase price of any proven not to be so, but it is mutually agreed between purchaser and ourselves that we will not be held for any greater amount than the original purchase price.

General Information

LOCATION: SPECIAL: We have just sold our Goshen plant of 96½ acres. All stock must be moved at once. See page 18 for Special Bargain prices. All our plant is now in Middlebury. We have just purchased 290 additional acres making our nursery now over 400 acres. Watch us grow. Mail all orders to Middlebury where our big packing plant and offices are.

ORDERING—In ordering be sure to state how you want your orders sent and give your express office. Order early. On all orders of one dollar or more received before March 10, we will add a Rambler Rose as a premium, providing you mention it in your order.

SUBSTITUTION—We do not substitute unless requested. When you place your order here you get what you want or your money back.

REFERENCES—First State Bank, Middlebury, Indiana; Elkhart County Trust Company, Goshen, Indiana, or any bank or business house in Elkhart County.

SHIPMENT—We commence to ship about March 10, weather being favorable and shipping season lasts until May 25th. We ship order any week you designate in your letter, weather being favorable. We have every means at hand to have your stock reach you in the best condition.

TERMS—Cash before order is shipped. We will book orders when one-fourth cash accompanies the order, balance to be paid before stock is shipped.

CLAIMS—All claims for shortage must be made inside of ten days after goods are received. If stock is not satisfactory complaint must be made at once. No attention will be paid to claims received months after the goods have been received.

PARCEL POST—Strawberry plants can be sent by Parcel Post. If you wish them sent in this manner add 15c per 100, or we can send them Parcel Post collect, whichever is preferred. Rural carriers collect postage and it is cheaper than express and brings plants to your door.

REMITTANCES—Make same by express money order, post office order, draft or registered letter. Checks from responsible persons are also taken.

CONCLUSION—We offer our customers three essentials necessary to success and embodied in stock grown by us, 1st, extreme hardiness; 2nd, power to bear early; 3rd, true to name. Think it over.

We make a specialty of evergreens. We quote as follows, B & B is 4 years twice transplanted beds.

Above evergreens are ideal where the customer wishes to start with small investment.
CONIFEROUS EVERGREENS

Evergreens are always in favor for landscape work, their different colored foliage making a strong background for the brilliant colors of Summer, but it is in Winter, when the Northern landscape is barren of color and foliage, and the beauty of the Southern greatly lessened, that they are most appreciated, the absence of other colors tending to bring out the beauty of form in a most striking manner.

Our Conifers are grown in the most careful and scientific manner. We transplant them several times before allowing them to go out to our customers, insuring a strong fibrous root growth. Trees that have not been several times transplanted and become acclimated to our climate are almost sure to die.

CAUTION—Do not buy cheap Evergreens. Unless they have been treated as above stated you will be disappointed with results. Do not let the sun or wind strike the roots of Evergreens even for a few minutes; you will kill them if you do. Every Conifer offered in this catalog, unless otherwise stated, is taken from the field with the roots securely closed in a ball of earth and this bound on with a piece of burlap. The roots are never exposed. When you receive the plants, have hole ready, remove burlap (but not dirt), plant immediately, water thoroughly but do not apply over foliage.

ABIES (The Firs)

This family embraces many different forms and characters. They are pyramidal, erect and spreading; foliage varying in color from light to dark green, to gold and blue. They possess the vigor to establish themselves in any type of soil and will thrive in clay, stony and poorer soils where some Evergreens may fail. Seem to withstand the soot and dust of our cities better than the general Evergreen family. They make a sparse root system requiring extra care in planting and until established. The needles are short and slightly prickly.

DOUGLAS (Douglas Fir)—A cone-shaped tree of very light bluish green foliage, even lighter on under side. Very desirable. 2 ft., $4.50; 3 ft., $5.00.

JUNIPERUS (Junipers or Cedars)

Trees are generally pyramidal in shape and hardy everywhere. The needles are short and generally bright on the under side. They transplant kindly and should be more generally used. They are nearly all native of the northern country and more handsome in cultivation than in their native soil.

VIRGINIANA (Red Cedar)—A well known native tree; varies much in habit and color of foliage; very attractive in Winter when the golden bronze of the young growth contrasts with the dark green of the older. 3 ft., $5.00; 5 ft., $12.00; 18-24 in., $2.00; 2-3 ft., $3.00.

GLAUC A (Grey Cedar)—Similar to Red Cedar in form and of a soft bluish green foliage. Useful formal plantings. 18-24 in., $4.00; 1 ft., $6.00.

HIBERNICA (Irish Juniper)—Of slender columnar habit with glaucescent foliage. Useful formal plantings. 18-24 in., $2.00; 2 ft., $3.00; 5 ft., $5.00.

PFITZERIANA (Pfitzer Juniper)—A graceful, broad, pyramidal Evergreen with sweeping fronds of grey-green foliage, making in time a distinctive, beautiful tree. 18-24 in., $2.50; 2 ft., $3.00.

SABINA (Savin Juniper)—Especially suitable for hillside planting or among rocks; like a prostrate shrub in habit, and useful for all low planting. The foliage is deep green and unchanging in its color. 18-24 in., $2.50; 2-3 ft., $5.00.
ARBOR VITAE

AMERICAN—One of the finest Eversgreens for hedges. It grows rapidly and soon forms a most beautiful hedge; very dense. Of course it is never adapted to turn stock, but it forms a most desirable and ornamental screen to divide the lawn from other parts of the ground. 18-24 in., $1.25; 2-2½ ft., $1.50; 3-4 ft., $3.00.

GOLDEN—A beautiful variety of Chinese Arbor-Vitae; compact and globular; color a lively yellowish green; not quite so hardy in the North, should be planted in a shady situation, where it will give a brilliant touch of color like sunshine. 18-24 in., $3.00; 12 in., $1.00.

PYRAMIDALIS—An exceedingly beautiful, bright variety, resembling the Irish Juniper in form; foliage a deep green, color retained in Winter; perfectly hardy. Should have a place in every collection. 12-18 in. 75c; 2-2½ ft., $2.50; 6-8 ft., $3.00.

COMPACTA—Foliage light green; habit dwarf and compact. Fine for small places. 12-18 in., $2.00; 18-24 in., $3.00.

PEABODY GOLDEN—Very beautiful, attaining a size of 8-10 ft. 12-18 in., $2.00.

TOM THUMB—Small, compact, with feathery foliage. A beautiful ornament for small yard or cemetery lot or low hedge. 12-15 in., $1.00; 15-18 in., $2.00; 18-24 in., $3.00.

GLOBOSA—Forms a dense, low, globular shape. A beautiful Evergreen. Particularly fine for formal plantings. 12-18 in., $2.00; 18-24 in., $3.00.

HOVEY'S GOLDEN—A small tree, globular in form, foliage light; green with a golden tinge and very compact; hardy. 12-18 in., $2.00; 18-24 in., $3.00.

PICEA (The Spruces)

These trees are all easy to transplant, and the most popular of the Evergreen family. They are perfectly hardy and grow rapidly and are pyramidal in shape. They are used for specimens in groups or as foundation adornment, as screens, windbreaks or hedges they are equally appropriate. Needles are uniformly short. We have a fine stock of sheared plants that will please every purchaser.

COLORADO BLUE (Picea pungens glauca)—This species has been tested at various points on the prairies of the West and Northwest with perfect success, enduring a temperature of 30 degrees below zero in exposed situations, entirely uninjured. This is not only one of the hardiest, but the most beautiful in color and outline; of a rich blue or sage color; it is a valuable acquisition. 2 ft., $7.50; 3 ft., $12.00.

NORWAY—A lofty, elegant tree of perfect pyramidal habit, remarkably elegant and rich; it gets age, has fine, graceful, pendulous branches; it is exceedingly picturesque and beautiful. Very popular and deservedly so. One of the best Eversgreens for hedges and windbreaks. 1 ft., $1.00; 2 ft., $2.50; 3 ft., $3.00; 4 ft., $4.00; 5 ft., $5.00.

HEMLOCK (Tsuga canadensis)—An elegant pyramidal tree, with drooping branches and delicate dark foliage, like that of the yew. Distinct from all other trees. It is a beautiful lawn tree, and makes a highly ornamental hedge. 2 ft., $5.00.

PINE (Pines)

Pines seem to grow anywhere, high or low ground, exposed or shaded position, in rich or poor soils, they are at home. After established they grow rapidly and when given space quickly raise their heads and spread their great branches, soon making a wonderful tree. The needles are invariably long and with age droop gracefully. Plant any kind and be assured of getting quick results.

AUSTRIAN OR BLACK (Pinus Austriaca)—A remarkably robust, hardy spreading tree, leaves long, stiff and dark green; growth rapid; valuable for this country. 2 ft., $5.00.

SCOTCH (Pinus Sylvestris)—A fine, robust rapidly growing tree, with stout, erect shoots and silver green foliage. 2 ft., $5.00.

WHITE (Pinus Strobus)—The most ornamental of all native Pines; foliage light, delicate or silvery green. 2 ft., $2.50; 1 ft., $1.50.

MUGHO (P. Mugho)—This is an excellent dwarf Pine, being globe shaped and branching when the new growth which seems like miniature candles completely covers the bush. 1½ to 2 ft., $4.00; 2 to 3 ft., $8.00; 1 ft., $2.50.

RETINISPORA

FILIFERA (Thread-branched Retinispora)—Of unique and showy habit, always noticeable. The leading shoot grows upright, the branches are nearly horizontal with long, drooping, twisted ends; plant with care, as it forms a beautiful screen. 2 ft., $5.00.

PISIFERA (Pea-fruited Retinispora)—Erect branches, pendulous at the tips; foliage feathery, light green, glaucous beneath. 2 ft., $5.00; 1 ft., $2.00.

PLUMOSA (Green Retinispora)—Densely conical, with fern-like leaves of bright green, carried on erect, plummy branches. 3 ft., $5.00; 12-18 in., $1.50.

PLUMOSA AUREA (Golden Retinispora)—One of the few really golden Eversgreens. The color of the young growth contrasts strongly with the darker shade of the older foliage. Striking and useful in many ways. 12-18 in., $1.50; 2 ft., $5.00.
ORNAMENTAL HEDGES

A small amount of money invested in beautiful hedges will add more value to a country or town home property, dollar for dollar, than any other similar investment without exception. A hedge planted about the borders of a lawn will transform a heretofore bare looking spot into a place of beauty; and you can keep it low or let it go high, as a screen. City lots may be divided by hedging with fine effect. In dozens of different ways, which suggest themselves to the property owner, hedging may be used with great profit. A hedge is easily set, a little care will keep it in perfect condition and it is a wonder that more are not planted.

**LIGUSTRUM (Privet)**

**AMURENSE (Amoor River Privet)**—A valuable ornamental shrub for hedging and borders. Very hardy foliage; glossy green, and holds its color almost the entire year. Will stand clipping to any extent. 12-18 in. No. 1, 10c each; $8.00 per 100; 18-24 in. 15c each; $12.00 per 100.

**IBOTA (Chinese Privet)**—A native of China and Japan. Foliage long and shining; flowers large, white and fragrant. Valuable for its flowers and foliage. 1-yr., $12.00 per 100; 2-yr., $20.00 per 100; 3-yr., $25.00 per 100.

**LIGUSTRUM REGELIANUM (Regels)**—The horizontal, sometimes drooping branches are distinctly beautiful. The plant is dense and compact, growing to 6 or 8 feet. Blooms in June and July, and has berries like weeping. 1 yr., $12.00; 2-yr., $20.00; 3-yr., $25.00 per 100.

**THUNBERGI (Japanese Barberry)**—This is a low shrub, with brown, horizontal branches growing so thick and matted that, even though the leaves fall in winter, the hedge still is dense. Add to that the appearance of the bright scarlet berries growing almost as thick as leaves and fresh till Spring and you have an idea of its Winter garb. In the summer there are hosts of little pale yellow flowers among small, round foliage. 2 yr., 12-18 in., 10c each; $8.00 per 100; 3 yr., 12-18 in. bushy, 20c each; $12.00 per 100; 18-24 in., 25c each; $20.00 per 100.

**EVERGREEN HEDGES**

**ARBOR VITAE**—Makes a neat beautiful hedge. It stands trimming well. Especially effective in winter. Get our 100 rate.

**NORWAY SPRUCE**—For Hedges and wind breaks. Special prices by the 100.
MAKING THE HOME BEAUTIFUL

More attractive homes! Homes larger, better built, more convenient, more attractive. Not only for more heat, more light, more comfort, but also for more beauty.

When God made this country it was a place of trees, shrubs and flowers. Today men are beginning to realize that God's way is the best and everywhere men and women are striving to retain as much of that former beauty as they can. Parks and reserves for everybody, playgrounds for children, green lawns and shrubs and trees and flowers. Civic centers for making better citizens.

Your own home, too, may be likewise a center of beauty at how small a cost many people do not realize. A little loving care is the largest item. Making the desert blossom like the rose is figurative, but making the home grounds more attractive is one step in the process.

Residence of James Boyer, Elkhart, Ind.

Landscape Service

You may say that you do not know what to plant, that you would like to do something if you only knew what. One purpose of our landscape department is to meet just such emergencies. We are pleased to offer you the services of trained men to advise what to plant to best bring out the full beauty of your house and grounds. No job too small for our attention, no job too large for our facilities to handle.

Some one has said that as we pass through this world only once, each one of us should leave the world a better place in which to live. Certainly planting a tree, setting a shrub or making flowers bloom in a harmony of color is one way to make the world a better and more beautiful place in which to live.

Write us today for your needs.
SHADE TREES
FOR BEAUTY AND SHADE

ASH (Fraxinus)
EUROPEAN, MOUNTAIN—A fine, hardy tree; heads dense and regular, covered from July till Winter with great clusters of bright red berries.
4-5 ft. 50c; 6-8 ft., $1.00; 8-10 ft., $1.50.

BEECH (Fagus)
PURPLE-LEAVED—Discovered in a German forest. An elegant tree, growing 20 to 30 feet high. Foliage a deep purple, changing to crimson. Like all varieties of the Beech, this is difficult to transplant, hence small trees 3 feet high are preferable. 3 to 4 ft., $8.00 each; 6 to 8 ft., $12.00.

BETULA—THE BIRCHES
BETULA ALBA—(European White Birch)—A graceful tree with silvery bark and slender branches. Very effective when grouped with evergreens. 5-6 ft., $1.00.
A. LACINIATA PENDULA (Weeping Cut-leaved White Birch)—Undoubtedly one of the most popular of all weeping trees; tall and slender, graceful drooping branches, silvery white bark, delicately cut foliage. A well known favorite of great beauty. 5-6 ft. $2.50; 6-8 ft., $3.00

THE CATALPAS
CATALPA BUNGEI (Chinese Catalpa)—Umbrella-like head only three or four feet high and twice as broad, forming a pretty dome-shaped head of great, soft, leathery leaves. It is very desirable when grafted on stems five to six feet high for border along drive walk, or around a park where you do not desire tall trees. 3 year head, $2.50; 2 yr., $1.50; 1 yr., $1.00.
C. SPECIOSA (Western Catalpa)—Very hardy. Rapid grower. White flowers in late spring. 5-6 ft., 50c; 6-8 ft., $1.00; 8-10 ft., $1.50.

CERCIS
(Judas Tree or Red Bud)—A medium sized tree with large, irregular head. Profusion of reddish-pink blossoms in early spring before foliage appears; one of the finest ornamental trees. 5-6 ft. $1.00; 6-8 ft., $2.50.

ELM (Ulmus)
AMERICAN—A noble native tree of large size, wide-spreading head and graceful, drooping branches. One of the grandest park and street trees. 5 to 6 ft., 75c; 6 to 8 ft. $1.25; 8 to 10 ft., $2.00; 2 in. $5.00 each.
MULBERRY (Morus)

For Those Who Realize the Value of Quality

TEA’S WEEPING RUSSIAN—A weeping variety of the new well-known Russian Mulberry; perfectly hardy in Summer and Winter; withstands extreme heat and cold and grows naturally in a very graceful form. 2-yr., 4 ft., $2.50.

MAPLE (Acer)

NORWAY—A native of Europe; a large, handsome tree, with broad, deep green, shining foliage. The handsomest and one of the most desirable trees for street, park or lawn. 6-8 ft., $2.00; 2 in., $3.50.

SUGAR OR ROCK—A very popular American tree, and for its stately form and fine foliage justly ranked among the very best, both for lawn and the avenue. 8 to 10 ft., $2.00 each.

SCARLET—A rapid growing tree with red flowers which appear very early in the Spring. 8-10 ft., $2 each.

SILVER—A hardy, rapid-growing native tree of large size. Valuable for producing a quick shade. Excellent for street planting. 8 to 10 ft., $1.00; 6 to 8 ft., 75c.

ASH-LEAVED (Box Elder)—A fine, rapid-growing variety with handsome light green foliage and spreading head; very hardy; desirable for street planting, and succeeds in many sections where other varieties of Maple will not thrive. 6 to 8 ft., $1.00; 8 to 10 ft., $1.50.

JAPAN—Foremost among ornamental stock are the Japanese Maples which, for beauty of coloring, are unsurpassed. They are yearly gaining in favor, and for effective grouping in landscape gardening are invaluable, including varieties with finely cut, bright and dark red, yellow and green and variegated leaves, 2 to 3 ft., $10.00.

WIER’S CUT-LEAVED MAPLE—A beautiful tree of graceful, half drooping habits. Leaves finely cut and luxuriant. One of the best of the ornamental trees. 6-8 ft., $1.50; 8-10 ft., $2.50.

POPLAR (Populus)

LOMBARDY—Well known for its erect, rapid growth and commanding form; very desirable in large grounds and along roads to break the average height and forms of other trees. 5-6 ft., 60c; 6-8 ft., 80c; 8-10 ft., $1.00.

SYCAMORE

ORIENTAL PLANE—A lofty, wide-spreading tree; heart-shaped leaves; valuable for its handsome foliage and free growth; not so subject to disease as our native species. Entirely free from worms and insects. One of the oldest cultivated trees known. One of the best and most popular for street and avenue planting. 6-8 ft., $1.50.

SALIX—THE WILLOWS

SALIX BABYLONICA (Weeping Willow)—The well-known common Weeping Willow; makes a large tree with drooping branches. Very fine for planting on the margin of streams and ponds. 6-8 ft., $1.50.

S. ELEGANTISSIMA (Thurlow’s Weeping Willow)—Strong upright, with smaller branches drooping; puts out early and has good foliage through the season; probably the best Willow. 6-8 ft., $2.00.

S. VITELLINA (Yellow Barked Willow)—Erect in growth. Bark very yellow or golden color. 6-8 ft., $2.00.

S. WISCONSIN (Wisconsin Willow)—A large tree with long, drooping branches, similar to babylonica, but much harder. 6-8 ft., $1.50.

TULIP TREE

LIRIODENDRON TULIPIFERA—One of the grandest of our native trees. Of tall, pyramidal habit, with broad, glossy, fiddle-shaped leaves, and beautiful tulip-shaped flowers. 6-8 ft., $1.50.

Cut Leaf Birch
Field Grown Hardy Ornamental Shrubs

Its not a home until its planted. Just a little shrubbery adds a touch of beauty. It has been said that we may doubtless live as-long without beauty around the home but just as doubtless not as happily.

By carefully selecting different varieties of shrubs a succession of bloom may be had throughout the season. Shrubs give you not only the cool green of foliage but the flash of colorful blossoms.

ALMOND
DOUBLE-FLOWERED—A most desirable early-flowering shrub, with white and pink flowers. 1 yr. 25c; 2 yr. 50c; 3 yr. 75c.

ALTHEA—(Rose of Sharon)
Unsurpassed by anything in the hardy shrub line for freedom of bloom or range of color. From midsummer until frost, when few other shrubs are in bloom, the Althea is most handsome, with its large camellia-like flowers of the most varied and beautiful shades.

DOUBLE WHITE—White, with crimson center.
DOUBLE VARIGATED—Pink and white.
DOUBLE PURPLE.
DOUBLE BLUE—Deep blue.
DOUBLE RED—An excellent striped variety, nicely marked white and rose.

ALARIA
ALARIA PENTAPHYLLA—A pretty medium sized shrub. Holds leaves until late in fall. Valuable for screen planting. Flowers inconspicuous. 1 yr. 25c; 2 yr. 50c; 3 yr. 75c.

ARALIA
ARALIA PENTAPHYLLA—A pretty medium sized shrub. Holds leaves until late in fall. Valuable for screen planting. Flowers inconspicuous. 1 yr. 25c; 2 yr. 50c; 3 yr. 75c.

BUDDLEIA
BUDDLEIA VEITCHI MAGNIFICA—A very attractive new addition to the flowering plants. While a perennial in habit, yet because of its vigor and size, it is used largely in shrub plantings. The tops in severe winter will freeze back, but it pushes with such renewed vigor this is not harmful. The flowers are borne on the tips of every bit of new growth, and in August the plants are masses of purple and violet flowers, very conspicuous, that attract butterflies. 2-3 ft., 50c; 3-4 ft., $1.00.

BERBERIS THUNBERGI ATROPURPUREA (Red Japanese Barberry—This shrub fills a long felt want. Since Wheat Rust attacked this country and all Purple and Common Barberries had to be cut out, there has been a great demand for a new type that would satisfactorily take the place of the old Purple Barberry. We offer the new Red Japanese

A MATTER OF COMPARISON

One of our customers was sorely puzzled recently over some cheap prices that he found in the advertisement of a current magazine, such as 5 evergreen for 10c; 6 shrubs for 25c; fruit trees, an orchard for $1.00. "How Come," he asked. So I went to one packing house and got him samples of "cheap" shrubs and 10c fruit trees. Of course he did not want them. In the box we explain the difference in shrubs. Besides these grades there are "rejects and culls." Be sure that the old adage "something for nothing" is nowhere so true as in nursery stock.
For Those Who Realize the Value of Quality

and guarantee that if it is placed in a position of plenty of sun it will do as well as the old time Purple.

Red Japanese Barberry may be used for the shrubby border, for clumps, or even as a specimen shrub. The color is a rich bronze red similar to the best of the Bloodleaf Japan Maple. It is like the Japanese Barberry in all other respects: attaining its beautiful orange and bronze coloring in Fall, and bearing the same profusion of bright red berries throughout the winter.

BERBERIS—(Barberry)
BERBERIS THUNBERGII (Japanese Barberry)—Low, compact growing shrub much used for border or hedge planting. Can be trimmed for formal planting. Small flowers in May followed by abundance of berries which turn to deep scarlet in Winter. The fine green foliage turns to a brilliant red in Autumn. Very attractive. 12-18 in., 25c; 18-24 in., 50c; 2-3 ft. 75c.

BECHTEL’S DOUBLE FLOWERING CRAB—A sturdy grower, hardy and a medium size, flowers large, double, resembling double pink roses; very fragrant when in bloom, looks like mallow rose, blooms young. 2-3 ft., $1.50.

CALYCANTHUS (Sweet Scented Shrub) The old-fashioned sweet shrub with a rare and peculiar fragrance of wood and flowers, an abundance of chocolate colored flowers in June and at intervals afterward. Foliage rich dark green. 2 yr. 50c, 3 yr., 75c.

CHIONANTHUS VIRGINICA (White Fringe)—A very desirable shrub for its white blossoms which make it seem a cloud of snowy lace against the deep green foliage. A fine shrub for specimen planting. 3 yr. $1.

CLETHRA ALNIFOLIA (Sweet Pepper Bush)—A very valuable shrub for border planting on account of the abundance of sweet scented white flowers on long spikes during July and August. Suitable to wet and shady places. 2 yr. old 50c.

COTULA ARBORESCENS (Bladder Senna)—A rapid-growing large shrub with light green foliage. Yellow flowers in June followed by showy red pods. 2 yr. 50c.

CRATAEGUS OXYACANTHUS VAR. OCCINEA FLORE PLENO (Paul’s Double Scarlet Thorn). The best of the double varieties. A small ornamental tree. Flowers a bright carmine-red; superior to any of its color. 3 yr., 75c.

CYDONIA JAPONICA—Brilliant flowering shrub covered with scarlet flowers early in the spring. Good for masses; 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.
DEUTZIA

One of the finest of shrubs for abundance of pretty blossoms which cover the plants in early Spring. Can be used in borders, mass or specimen planting. Very good.

**D. CRENATA FLORE PLENO** — Flowers double, white, tinged with rose. Blooming in late June. Very hardy. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**D. GRACILIS**—Of dwarf habit. Flowers pure white. One of the first to bloom. Fine for edging in front of taller shrubs. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**D. LEMOINEI** — Flowers pure white; shrub medium and free-flowering. Excellent for forcing. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**D. PRIDE OF ROCHESTER**— Produces large double white flowers tinged with rose. Profuse bloomer. One of the best. Flowers early. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**EXOCHORDA GRANDIFLORA** — PEARL BUSH—It grows vigorously to a height of 6 to 10 feet. The early buds look like pearls strung on slender threads. May opening them up to long, gleaming sprays of pure white. 2 yr., 75c.

ELAEAGNUS

**FORSYTHIA** (Golden Bell)—These splendid old shrubs growing 8 to 10 feet tall eventually, light up the garden with glinting masses of yellow, very early in spring before leaves appear. The upright form make excellent tall hedges, and are bright-hued fillers for massed shrub groups.

**EUONYMUS** (Strawberry Tree)

**ALATUS** — (Cork-barked Euonymus)—Very attractive in Autumn when full of bright colored fruit and brilliant crimson foliage. Bark very early. 2-8 ft., 75c; 4-4 ft. $1.00.

**FORSYTHIA** (Golden Bell)—These splendid old shrubs growing 8 to 10 feet tall eventually, light up the garden with glinting masses of yellow, very early in spring before leaves appear. The upright form make excellent tall hedges, and are bright-hued fillers for massed shrub groups.

**INTERMEDIA**—The earliest blooming. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**VIRIDISSIMA** — Twisted flowers. Not dependable for hardiness in northern latitudes. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**FORTUNEI**—The most upright in growth. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

**HAMAMELIS VIRGINIANA** (Witch Hazel)—Has a wealth of delicate yellow flowers appearing in late fall. Exceptionally beautiful at the edge of a wood or along woodland paths. 1 yr., 25c; 2 yr., 50c.

NOTE

We sell 10 of any 1 year old Shrub for $2.00
We sell 10 of any 2 year old Shrub for $4.00
We sell 10 of any 2 year old Shrub for $6.00
HYDRANGEA ARBORESCENS
(Snowball Hydrangea)
—Has the appearance of a low-growing snowball with its large clusters of white flowers. Particularly desirable on account of coming into bloom before the H. paniculata. Its blooming period is from early June until middle of August. A very desirable shrub. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

PANICULATA GRANDIFLORA—One of the most popular shrubs in cultivation blooming at a time when few shrubs are in bloom. Flowers borne in huge panicles from 8 to 12 inches long, delicate pink changing to brown. Very desirable. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

TREE HYDRANGEA—This is the Paniculata Grandiflora with all its beauty of great clusters of blooms in tree shape. Will grow 10 to 12 feet high. 2-3 ft., $1.50.

KERRIA (Corchorus; Globe Flower)
An attractive shrub with slender green branches and showy yellow flowers. It thrives in almost any well-drained soil. Hardy, but benefited by protection from cold winds in severe climates.

JAPONICA—A slender green-branched shrub covered with single yellow flowers from July to October. 1 yr., 25c; 2 yr., 50c.

LILACS
Lilacs are well-known, beautiful shrubs, indispensable in every collection.

CHARLES THE TENTH—A strong growing bush producing loose trusses of reddish purple flowers which fade to mauve. 3-4 ft., $1.00.

FRAU BERTHA DAMMANN—Single; large panicles of pure white flowers. Very fine variety. 3-4 ft., $1.00.

LUDWIG SPAETH—One of the darkest shades, very dark crimson purple. Single. $1.00 each.

PERSIAN LILAC (S. Persica)—Grows four to six feet high, foliage small and flowers a bright purple. 2-3 ft., 50c; 3-4 ft., 75c.

Shrubs received and more than pleased with them. Had no idea of receiving such large well developed plants and well rooted plants. The earlier part of the week I transplanted 12 Barberry bushes four years old to make room at side of house for your plants, as I wanted the large ones in front; and on the arrival of your plants I found my work would have been unnecessary as the plants received were as fine as the ones removed. Respectfully yours, removed. Wearle Mast, 1488 Beaver Road, Haysville, Pa.
HONEYSUCKLE—(Lonicera)
These vigorous tall growing shrubs are invaluable for screening and massing effect, with their dense green foliage and showy red berries appearing in summer and continuing until early fall. They are one of the most desirable shrubs. Fine for tall hedges. Can be kept trimmed.

TATARICA RUBRA—(Red Tartarian)—A beautiful shrub. Vigorous and producing large, bright red flowers, striped with white, in June. Very desirable. 2-3 ft., 50c; 3-4 ft., 50c.

TATARICA ALBA—A large shrub having white flowers in May and June. 2-3 ft., 50c; 3-4 ft., 50c.

TATPETELLA—(Japanese Bush Honeysuckle)—A spreading variety growing 4 to 6 feet tall; blooms early in spring, pure white, followed by pretty red berries. 3 ft., 50c.

MAHONIA MAHONIA (Ashberry)
AQUILIFOLIA (Holly-leaved Mahonia)—A native shrub; very handsome, with purplish shining prickly leaves and bright yellow flowers in May, followed by bluish berries. Very ornamental. 12-18 in., $2.00 each.

PHILADELPHUS (Mock Orange or Syringa)
This old-fashioned shrub with creamy white flowers borne in clusters is found in many plantings. There are many varieties that offer a wide range of size and blooms. All varieties are strong growers and are suitable for border, screen or specimen planting. We have a few new varieties that are exceptionally fine and you will be highly pleased with them. 1 yr., 25c; 2 yr., 50c; 3 yr., 75c.

AVALANCHE—A graceful shrub with slender arching branches covered with white flowers. One of the best.

CORONARIUS (Garland Syringa)—Pure white; very fragrant flowers. One of the first to bloom.

CORONARIUS VAR. AUREUS (Golden-leaved Syringa)—A beautiful shrub with golden yellow foliage. Keeps its color the entire season. Splendid for grouping with other shrubs in border planting.

GORDONIANUS (Gordon's Syringa)—A vigorous grower and profuse bloomer. White flowers; fragrant; and late.

GRANDIFLORUS (Large-flowered Syringa)—Has large showy flowers, somewhat fragrant. Dark reddish. A rapid grower.

LEMOINEI (Lemoine's Syringa)—A graceful shrub with very rich foliage and large pure white fragrant flowers in June.

MONT BLANC—A charming variety; dwarf in habit with very large fragrant flowers produced in great abundance.

PHILADLPHUS VIRGINAL—The newest and loveliest of the Syringas. Blossoms are as large as a dollar, waxy white and continue all summer. Nothing before ever like it. 2-3 ft., $1.00 each.

PHILADELPHUS (Mock Orange)
PRUNUS (Plum)

TRILOBA (Double-flowered Plum)—A very desirable addition to the hardy shrubs. Flowers double, delicate pink and thickly set on long slender branches. Blooms in May. 2-3 ft. $1.00 each.

PISSARDI (Purple-leaved Plum)—This is the finest purple-leaved tree or shrub. In the Spring the leaves are crimson, changing to dark purple as the season advances. This splendid color maintained until the leaves drop in the fall. 3 to 4 ft., $1.00 each.

RHAMNUS

Ornamental and beautiful woody plants which are grown chiefly for their handsome dark green foliage and also for their attractive fruit. The variety we list is dependably hardy.

RHAMNUS CATHARTICA (Buckthorn)—A stiff, twiggy, tall shrub, 6 to 10 feet high, with dark foliage. A profusion of attractive white flowers in June and July, followed by showy dark fruit. Makes a fine hedge or border plant. 1 yr. 25c; 2 yr. 50c; 3 yr., 60c.

RHUS SUMAC

The Sumacs are among the most showy of our ornamental shrubs in Autumn, their picturesque, gnarly, wind-bent masses forming a familiar part of the landscape along country roadsides in many parts of the country. The flowers are bright yellow in large terminal panicles, which in some sorts turn brilliant red in late Summer. Fine for mass planting.

RHUS CANADENSIS (Fragrant Sumac)—Grows 3 to 4 feet high and has handsome foliage that emits an aromatic odor when bruised. Conspicuous in early Spring by its yellow flowers; a good cover plant for dry rocky banks. 1 yr., 25c; 2 yr., 50c; 3 yr., 60c.

R. GLABRA (Smooth Sumac)—A tall shrub, growing 8 to 15 feet in height with handsome foliage which colors brilliantly in fall. Flowers yellowish green in July followed by scarlet fruit. 1 yr., 25c.

R. GLABRA LACINIATA—A variety of the Smooth Sumac with deeply cut, fern-like foliage. Makes a pleasing appearance in the fall when it assumes very brilliant coloring. 1 yr., 25c; 2 yr., 50c.

R. TYPHINA (Staghorn Sumac)—Shrub or small tree, growing sometimes to 30 feet, Very desirable for hot dry locations where it thrives luxuriantly, and in such soils its Autumn colors begin to show in August. The crimson fruits persist throughout the Winter. 1 yr., 25c; 2 yr., 50c.

R. TYPHINA LACINIATA (Cut-leaved Sumac)—A showy broad-headed shrub with large, long, deeply cut foliage; light green in color, changing to shades of red and yellow in Autumn. The new growth is clothed with a peculiar down, giving an appearance of the growing horn of a deer. The bark below is a rich orange color. The flowers are borne in dense terminal panicles in June and July and are followed by impressive red fruits. 1 yr., 25c; 2 yr., 50c.

RHODOTYPOS (Jet, Bead)

RHODOTYPOS KERRIOIDES (White Kerria)—An attractive shrub with handsome yellowish green, corrugated foliage and large, single white flowers late in May, succeeded by black seeds. 3 to 6 feet high. 1 yr., 25c; 2 yr., 50c; 3 yr., 60c.

SPECIAL NOTICE

Our change of location makes it necessary to dispose of a lot of stock. We must sacrificer. You gain. See page 18 for Bargains.
SPIREA

An indispensable class of small to medium-size shrubs. Unsurpassed in beauty. Easy of culture and very hardy. Very satisfactory for single or clustering effect and planted more largely than any other flowering shrubs. The bloom period of the different sorts extends from May till September.

S. ARGUTA—4 to 5 feet. Of dwarf, slender, graceful habit; foliage fine, light green; blossoms very early, last of April or first of May. 1 yr., 25c; 2 yr., 50c.

S. ANTHONY WATERER—2 to 3 feet. An improved variety of this type; dwarf, upright grower, covered from June or July until fall with large heads of dark crimson flowers. Darker than Bumalda. A valuable addition to the list. 1 yr. 20c; 2 yr., 50c; 3 yr., 60c.

S. BILLIARDI—4 to 6 feet. Medium sized, upright grower with spikes of rose-colored flowers in July. 2-3 ft., 50c.

S. BILLIARDI ALBA—Similar in foliage to Billardi except it has a white blossom. Hardy. 1 yr., 25c; 2 yr., 50c; 3 yr., 60c.

S. BUMALDA—A handsome variety from Japan. Dwarf in habit and of vigorous growth. Foliage narrow; flowers rose-colored and borne in great profusion a long time. 1 yr., 20c; 2 yr., 50c; 3 yr., 75c.

S. CALLOSA ALBA (Dwarf White Spirea)—2 to 3 feet. Similar in habit and growth to Anthony Waterer. The blossoms, however, are pure white; a free and continuous bloomer. 2 yr., 50c.

S. CALLOSA RUBRA—Has large panicles of deep rose blossoms, grows freely and blooms nearly all summer, 2 yr. 35c.

S. DOUGLASI—(Douglas's Spirea) A beautiful variety with spikes of deep rose colored flowers in July. 1 yr., 25c; 2 yr., 50c.

S. FROEBEL SPIREA (S. Froebeli)—Of the Anthony Waterer type, but more sturdy in habit. Canes distinctly reddish; young foliage tinged red; flowers rose color. Brilliantly colored in autumn. 15-18 in., 25c; 2-3 ft., 50c.

S. OPULIFOLIA (Nine-bark) Grows upright, attaining 8 to 10 feet. Bears white flowers in June. Old flower heads turn to a dark red and make a striking variety of colors at different stages of maturity. 2 to 3 ft., 25c; 3 to 4 ft., 50c.

S. OPULIFOLIA, VAR. AUREA—6 to 8 feet. Very much like the former, except that the foliage is yellow in spring, changing to golden bronze in autumn. 1 yr., 35c; 2 yr., 50c.

S. PRUNIFOLIA FL. PL. (Bridal Wreath) 4 to 5 ft. A fine variety with plum-like leaves. The branches are covered in May with small, double white flowers. Is in bloom for some time. 2-3 ft., 50c; 3 to 4 ft., 75c.

S. THUNBERGI—Forms a dense feathery bush, 3 to 4 feet high. Foliage changes to bright scarlet shades in autumn. 18-24 in., 50c; 2-3 ft., 75c.

S. VAN HOUTTEI—This is undoubtedly the most charming and beautiful of all the varieties having pure white flowers in clusters, the branches drooping to the ground. Foliage a rich green. Very profuse in bloom and plants remarkably hardy. The variety most commonly planted. Commonly called Bridal Wreath. 2-3 ft., 50c; 3-4 ft., 75c.

SNOWBERRY

(Symphoricarpos)

These are especially valuable for planting in the shade and in undergrowth.

S. RACEMOSUS (Snowberry) 3 to 4 ft. Flowers small, pink, in June or July; foliage dark green; berries large, white, hang well into winter. 2-3 ft., 50c; 3-4 ft., 75c.

S. VULGARIS (IndianCurrant, Coral Berry)—3 to 4 feet. Similar to Snowberry, except berries are smaller and are red. 2-3 ft., 50c; 3-4 ft., 75c.
For Those Who Realize the Value of Quality

17

PLICATUM (Japanese Snowball) — 6-8 ft. White. May. This species is one of the most satisfactory shrubs grown. Its pure white double blossoms with a setting of dark pleated leaves and perfect form make it one of the best. Fine for an individual specimen or in groups. 2-3 ft., $1.00.

STERILE (Old-fashioned Snowball) — 10-12 ft. White. May. This old-fashioned variety is well known to every lover of plants. Its balls of pure white literally cover the bush when in bloom. 2-3 ft., 50c.

VIBURNUM (The Snowballs) In this group are some of the most conspicuous shrubs for blossoms, berries, or autumnal foliage we have. They are all hardy, vigorous and healthy. For individual specimens or shrubbery borders they are desirable. Most of them will grow in partial shade but do better in the sun.

V. DENTATUM — Has glossy green foliage, white flowers in June, crimson berries turning blue in autumn. One of the best shrubs for landscape planting. 2-3 ft., 50c; 3-4 ft., 75c.

V. LENTAGO (Sheepberry) — Trees 20 to 30 feet with white flowers in cymes in May and June. Large oval blue-black fruit in autumn. 2-3 ft., 50c.

LANTANA (Wayfaring Tree) (F) 10-12 ft. White. June. A large, vigorous shrub with soft, heavy lanceolate leaves and large clusters of white flowers in May, succeeded by red berries which turn black as they ripen. 2-3 ft., 50c; 3-4 ft., 75c.

OPULUS (High Bush Cranberry) — 8-10 ft. White. May. Strong, rather spreading habit with single white flowers borne in flat clusters. The very showy red fruit which follows the beautiful coloring in the Fall go to make it one of the best. 2-3 ft., 50c; 3-4 ft., 75c.

VIBURNUM Plicatum

Eva Ratke Weigela
Dear Customer:

We have some good news for you. Last week we purchased one of the best farms in Northern Indiana, consisting of 290 acres of virgin soil, enlarging our Middlebury plant to over 400 acres. In the same transaction we disposed of our Goshen plant consisting of 100 acres, and all Nursery stock located thereon, we are compelled to move and dispose of before May 1, 1929. We are therefore offering this stock to our customers, prepaid to your door, at practically the cost of digging and packing.

All varieties included in these bargains will be standard varieties but they must be left to our selection.

THE KRIDER NURSERIES, INC.
Middlebury, Indiana

SPECIAL PREMIUMS FOR EARLY ORDERS

As a rule most people wait until the first warm, sunshiny days of spring before they begin to think of ordering trees, plants and vines. Then they all send in their orders at one time, and to take care of these orders promptly we have to employ extra clerks and packers. If we can induce part or all of our patrons to send in their orders early, we can distribute this work over a longer period of time and not only handle the orders better, but with a much smaller force of men and women. This means a considerable saving of time and money to us, and is the one and only reason we can make the liberal premium offer as set forth below.

REMEMBER THE DATE BEFORE THIS OFFER EXPIRES

For all Spring orders amounting to $5.00 received before March 15, and for all fall orders received before October 15, we will allow you to select $1.00 worth of any fruit or shrubbery listed in our catalog. For all orders amounting to $10.00 we will allow you to select $2.00 worth. For all $20.00 orders, $4.00 worth, and for all $50.00 orders, $12.00 worth; for all $100.00 orders, $25.00 worth.

BUT NO SPECIAL PREMIUMS GIVEN AFTER DATE GIVEN ABOVE
VINES AND CREEPERS

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established.

**VINES AND CREEPERS**

Nothing lends such pleasing effect to wall or veranda as the judicious use of vines. The hardy vine is best adapted for covering an unsightly wall or for furnishing shade and ornament to verandas. Hardy vines practically take care of themselves after they are once established.

**redirect|IVY** — (Ampelopsis)

**RED CREEPER** — A perfectly hardy, rapid climber, with large, five-lobed leaves which change to bright scarlet or crimson in autumn. 1 yr. 60c; 2 yr. 75c each.

**VAR. ENGELMANNII** — Shorter jointed and having finer foliage than Quinquefolia. Clings to brick or stone. A good grower and hardy. The best for the North and Northwest. 1 yr. 50c; 2 yr. 75c each.

**BOSTON, OR JAPAN IVY** (A. Veitchii) — From Japan. It is a splendid plant for covering any object, as it clings perfectly to the smoothest surfaces. The foliage is a bright glossy green, changing to bright tints of scarlet, crimson and orange. Kills back some in a cold, dry climate. 1 yr. 50c; 2 yr. 75c each.

**HONEY SUCKLE** (Lonicera) — A well-known vine, holding its foliage nearly all winter. Blooms in July and September, and is very sweet. 50c each.

**COMMON WOOD-BINE** (Lonicera periclymenum) — A strong, rapid grower, with very showy flowers, red outside, buff within. June and July. 50c each.

**HALL'S JAPAN** (Lonicera Halliana) — A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. 1 yr. 50c; 2 yr. 75c each.

**WISTERIA**

**CHINESE PURPLE** (Wisteria Sinensis) — A most beautiful climber of rapid growth, and producing long, pendulous clusters of pale blue flowers. When well established it makes an enormous growth; it is very hardy; and one of the most supreme vines ever introduced. The best vine to grow when it is desired to have it shade the upper part of the house. 1 yr. 50c; 2 yr. 75c each.

**CLEMATIS**

A beautiful class of climbers, many of the varieties with flowers, 5 to 7 inches in diameter. Excellent for pillars or trellises; or when used for bedding, running over rock work or an old tree stump, they make an excellent show. They delight in a rich soil, a sunny situation; perfectly hardy.

**DUCHESS OF EDINBURG** — A free flowering, double white variety with medium-sized flower. $1.00 each.

**HALL'S JAPAN** (Lonicera Halliana) — A strong, vigorous evergreen variety, with pure white flowers, changing to yellow. Very fragrant; covered with flowers from June to November. 1 yr. 50c; 2 yr. 75c each.
Krider's Hardy Northern Grown Roses

ALL THE NEWEST - ALL THE FINEST

Roses are undoubtedly the richest and most luxurious of all flowers. No garden or greenhouse is complete without them, on account of their loveliness. Many people think that it requires a southern climate to make them grow successfully. Not so. Hardy field-grown Roses such as Krid¬
er's will be a riot of luxurious lovel¬

ess if only a little care is used in choos¬
ing the soil and keeping off the Rose

pests.

A clay soil is needed for the best success. Spraying with Black Leaf 40 in an ordinary hand sprayer is usually sufficient to control insects.

Krider's northern field-grown Roses a r e exceptionally hardy. From the list given here any Rose connoisseur wi l l know that only the rarest and most beautiful kinds are offered. The kinds that bring a thrill to you when the blossoms open, the kinds that bring envy to your neigh¬
bors and the never omitted query

"where did you get it?" Send us a sketch of your yard and let our land¬
scaping department plan a Rose Garden for you.

HARDY EVERBLOOMING ROSES (2 year old). Unless otherwise noted all 2 yr. roses at 50¢ each; 3 for $1.20; 6 for $2.25; 10 for $3.00.

RED ROSES

AMERICAN BEAUTY—Conceded to be the most grandly beautiful of all Roses in size, form and color. Rich red, passing to crimson, delicately veined and shad¬
ed; fragrant.

GENERAL JACQUEMINOT—One of the most popular of the red Roses; brilliant crimson, large and very effective; very fragrant and one of the hardiest.

GRUSS AN TEPLITZ—Flowers dark, rich crimson, passing to fiery-red as they mature; one of the brightest grower and very hardy.

MARTHA P. WILDER—Bright cherry red; of good size; very fragrant and perfectly double. Plant in a vigorous grower and continues long in bloom. One of the best of its color.

RADIANCE—A brilliant rosy carmine, displaying rich and opaline-pink tints in the open flower. Each 75¢.

ULRICH BRUNNER—Seedling from Paul Neyron. Extra large, bold flowers; full and globular, color rich, glowing cherry, elegantly mingled with scarlet. Vigorous healthy, blooms freely. One of the best hardy roses.

WHITE ROSES

FRAU KARL DRUSCHKI—Snow white, very large, perfect form. Vigorous grower, free bloomer. Bright heavy foliage. One of the best white of all.

KILLARNEY WHITE—A pure white sport of the old pink Killarney.

KAISERIN AUGUSTA VICTORIA—Pure white, does not pink when planted out; large buds, full double blooms. Sturdy grower, bloom¬
ing from early spring till late.

MADAME PLANT¬
IER (H. P.)—Pure white, above medium size; full. Produced in great abundance early in the season. One of the best roses for groups.

MARGARET DICK¬
SON—A very free grower, foliage large and dark. Flowers white, with pale flesh center; petals are thick and bell-shaped, a fine sort.
For Those Who Realize the Value of Quality

PINK ROSES

BRIDESMAID — Clear, bright pink; a constant bloomer; large, full and globular; one of the finest Teas. Very fragrant.

MME. CAROLINE TESTOUT—Strong vigorous plants. The large, rounded flowers are bright satiny rose, with darker center, and edges of petals bordered with soft carmine-pink.

MAMAN COCHET—Pink. Rich, rosy-pink, shaded silvery rose on outer petals exquisite in color and graceful in form from bud to bloom, and delightfully fragrant; beautiful, healthy foliage and long, stiff stems.

MRS. JOHN LAING—This Rose is a silky pink, which shows different in varying lights. Finely formed, large, double, very sweet flowers, on long stems. The quick growing bush blooms nearly equal to the monthly Roses. One of the best Hybrid Perpetuals for all outside purposes, also desirable for forcing.

PAUL NEYRON—The largest Rose in cultivation. Sometimes called the Peony Rose. Color light, smoky rose; flowers are very double and full, delightfully fragrant. The plant makes a strong, healthy growth and has clean, glossy foliage. Blooms very good from June until late October.

YELLOW ROSES

CLIO—A large, globular rose; sweetly fragrant; of satiny flesh color, with a pink center, which when two-thirds open, is perfectly cup-shaped. The beauty is enhanced by a rosette of foliage about it.

BETTY—Glorious coppery rose, over-spread with golden yellow. Each 75c.

GOLDEN GATE—A beautiful yellow Rose, very double and full; fragrant; rich cream-white tinged with golden yellow; constant bloomer.

LADY HILLINGDON—The wonderful color of this beautiful rose is equalled by none. It has long, willowy stems that are in no sense weak. Has a long, slender pointed bud of brilliant deep golden yellow, improving in color as the flower matures. Awarded gold medal.

MISS LOLITA ARMOUR—Chromed-yellow at the base, shading to orange and copper hues on the reverse of the petals, and with much of the characteristic copper and shrimp-pink tints in its make-up. Each $1.00.

ORPHELIA—(Wm. Paul & Son, 1924)—A rose that is admired by everyone; its flowers are held erect on long, stiff stems, are of perfect form, good size, and of a most pleasing delicate tint of salmon flesh, shaded with rose; very floriferous.

SUNBURST—Orange-copper or golden orange; all intense shades; giving an extremely brilliant effect. A giant rose, long stems, long, pointed buds; vigorous, free and healthy. Each $1.00.

SOLEIL D'OR (Sun of Gold)—A strong, hardy Rose; large, full and double; golden orange yellow tinged with red and rosy pink; a magnificent Rose.

LOS ANGELES—One of the most notable American garden roses. Its color is luminous flame pink, toned coral, shaded translucent gold at base of petals. An upright, sturdily growing, bearing perfect, fragrant flowers on strong stems. Desirable in every garden. Each $1.00.
HARDY CLIMBING ROSES

These are the Roses so necessary for the home, giving it, no matter how humble or pretentious, a touch of beauty not to be had by any other form of adornment. They also have a most useful side, in that they give most delightful and refreshing shade when used on the porch, veranda or pergola. They are used very extensively in covering unsightly spots in the ground, for screening outbuildings. Are especially recommended for trailing down embankments and for cemetery planting; not subject to insect attack. All are hardy everywhere.

Price of Climbing Roses, all varieties, 2 yr. 35c each; 3 for $1.00.

CLIMBING AMERICAN BEAUTY — Flowers of large size, good form, of rich red color passing to crimson. Very fragrant. Good foliage and absolutely hardy.

DOROTHY PERKINS — Beautiful shell-pink, which holds for a long time, shading to a lovely deep rose. Very sweetly scented, hardy and a strong grower.

DR. W. VAN FLEET — This new Rose has a great future. In flower and foliage it is all that could be expected of a climbing Rose. Blossoms extra large resembling the tender Hybrid Tea Roses in shape and size. Its strong stems are 12 to 18 inches long, making it valuable for cutting. In color a delicate flesh pink changing when fully blown to a flesh white shade.

EXCELSA OR RED DOROTHY PERKINS — Intense crimson scarlet. Double flowers in brilliant clusters set in glossy green foliage. Extremely vigorous and one of the handsomest of all climbers.

PAUL'S SCARLET CLIMBER — An entirely new variety, combining vigorous growth, wonderful foliage and absolute hardiness, together with flowers almost as large as those produced on bush Roses; in color a brilliant scarlet which lasts well.

FLOWER OF FAIRFIELD (Everblooming Crimson Rambler) — Brilliant crimson. Flowers almost continually in brilliant clusters from early summer until frost.

CRIMSON RAMBLER — One of the most popular of the climbers. A rapid grower and perfectly hardy; flowers in rich clusters of vivid crimson. One year plants will attain a height of 10 to 20 feet in a single season and the second year they will produce a marvelous profusion of their rich glowing crimson flowers.

TAUSENSCHOEN (Thousand Beauties) — Varying in shade from a delicate flushed white to a deep pink or reddish crimson, in bright clusters, almost covering the handsome green foliage. A climbing Rose that comes to us from Germany. It gets its name from its many flowers and from their variation in coloring.

WHITE DOROTHY PERKINS — A pure white sport from Dorothy Perkins, with which It is identical in variety and habits. A valuable addition to the hardy climbing class. The plant is a strong rampant grower, covering a large porch or trellis in a remarkably short time.

AMERICAN PILLAR — Very large, handsome flowers of light, bright crimson, with a clear white eye surrounding numerous golden yellow stamens. These flowers fade to an agreeable light pink and are in great clusters.
B A B Y  R A M B L E R S  A N D  P O L Y A N T H A  R O S E S

A type of Rose which is very popular for bedding purposes. They form shapely, compact, bushy specimens about 18 inches high, producing a great profusion from early in the season, until severe frost, immense clusters of small flowers. Pruning is not necessary; simply remove the past season’s flower stems. 2 yr. old plants, 50c each; 3 for $1.25.

B A B Y  R A M B L E R — We have Baby Rambler, daddy of them all. It is in bloom all the time, flowers in large clusters of brightest crimson. It grows to a height of eighteen inches and hides the plant with its bloom. A most wonderful Rose.

B A B Y  T A U S E N D - S C H O E N — We have nothing lovelier in Roses than this dwarf Polyantha with its beautiful bouquets of creamy white, saucer shaped flowers, every petal edged with lovely rosy pink. One of the most beautiful of pot Roses.

G E O R G E  E L G E R — A lovely little yellow Polyantha Rose with a good mixture of Tea blood. Like all of its class, it is free in growth, free in bloom, with small glossy foliage produced in profusion. The

candid little pointed yellow buds open into pretty little symmetrical Rosen. Will prove a very popular corsage variety.

C A T H E R I N E  Z E I - M E T — This is the new White Baby Rambler. A continuous blooming Rose of great merit. Fine for bedding.

R U G O S A  A N D  H Y - B R I D  R U G O S A  R O S E S

R O S A  R U G O S A — an upright shrub, with spreading branches densely covered with thorns. The leaves are a dark, lustrous green above, lighter beneath. The blooms are purplish red, ordinarily 3 inches or more across, and are followed by bright red fruits which cling to the bush a long time. 2 yr., 35c each.

R U G O S A  A L B A — Similar to the above, but with pure white highly scented flowers, 2 yr., 35c ea.

C O N R A D  F E R D I N A N D  M E Y E R — Strong grower, perfectly hardy. Flowers silvery rose, large, well filled, very fragrant. 2 yr., 35c each.

F I M B R I A T A — Single pink variety, bushy and makes a very pretty bush, 35c each. 2 yr.

F. J. GROOTENDORST — A cross between Rosa Rugosa and Baby Rambler, retaining all the vigor, hardiness, and healthy foliage of the Rugosa. Fine red blooms. The only hardy and everblooming hedging or massing Rose, and for these purposes it is ideal. 35c each.

H A N S A — A typically Rugosa plant producing freely large, double, reddish violet blooms. Hardy and dependable and splendid for hedging or massing. 35c.

H U G O N I S (The Golden Rose of China) — Blooms three weeks earlier than most other Roses and is fairly covered in early Spring with single, golden yellow flowers. Fine for shrubbery and will make a symmetrical bush 6 feet high and the same in diameter when matured. 2 yr. 35c.

N E W  C E N T U R Y — Clear flesh-pink with bright red center, all the petals widely bordered with creamy white. The flowers are 3 to 4 inches across, and perfectly full and double. 2 yr. 52c.

Any three of Rugosa for $1.00
HARDY FLOWERING PLANTS

Perennial flowers give the satisfaction that comes from permanency. Year after year without any special care they bloom for you. If varieties are selected with regard to time of blossom flowers from early spring to late fall may be had. Remember the old-fashioned garden of your grandmother?

Price of all Perennial Clumps—Each 15c; per doz. $1.50; per 100, $12.00. Select as many varieties as you like to make up your dozen or hundred.

ACHILLEA (Milfoil or Yarrow)
Plants suitable for dry, sunny places. The dwarf kinds are useful for carpeting or for rockeries; the taller varieties as border plants.

MILEFOLIUM ROSEUM (Rosy Milfoil)—July to October. Rosy pink flowers in dense heads, on stems 18 inches high. Effective on edge of shrubbery or in border.

PTARMICA, THE PEARL—Pure white, double flowers all Summer. Prized for cutting.

ALYSSUM (Rockcress)—Very popular for beds, borders and winter flowering; of easiest culture and very free blooming.

ANEMONE, THE PEARL—Handsome, finely cut foliage, and large, golden yellow flowers produced all Summer. Succeeds in the poorest soil.

AQUILEGIA (Columbine)—As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose.

ARTEMISIA (Sage Brush) Lactiflora—A tall growing plant of fine foliage and heads of small white flowers in August and September, which fill the garden with fragrance an excellent background for other perennials, graceful cut flowers. A splendidly heavy soil where they will not lack for moisture.

DIANTHUS (Pinks). Hybrid Garden Pinks—Without the spicy fragrance of the Hardy Pinks a garden is incomplete. Their perfect form and rich coloring make them great favorites for Summer bouquets. June.

DIELYTRA OR DICENTRA (Bleeding Heart)—A hardy perennial with heart-shaped, rose-colored flowers in drooping spikes. Each 35c.

CAMPANULA (Bellflower)
A large and varied family of the greatest value. They are of the easiest culture, thriving in any ordinary garden soil.

MEDIUM (Canterbury Bells)—Blue, rose, white.
For Those Who Realize the Value of Quality

CHRYSANTHEMUMS

HARDY CHRYSANTHEMUMS — The inclusion of Hardy Chrysanthemums in your plantings makes it possible to have the garden bright with flowers after the majority of hardy herbaceous flowers are past. They are also valuable for cut flowers. The varieties offered below have been carefully selected and will give a flowering period of two months, from the middle of September until the middle of November.

CHRYSANTHEMUM MAXIMUM (Giant Moonpenny or Shasta Daisies).

ALASKA — Extra large.

PAPAVER (Poppy) Oriental — These are the regal representative of this popular genus. No plant is more brilliant in late spring or early summer than the Oriental Poppy, with its large flowers, silken petals and flaming colors. Whether planted singly or in masses their large flowers and freedom of bloom render them very conspicuous in any location. Easy of culture and a considerable range of color. Orange; Mrs. Perry, salmon rose; Bracteatum, rich blood red. 15c each, $1.50 per doz.

COREOPSIS (Tickseed) — An improved variety with large, bright yellow flowers; one of the best hardy plants. Fine for cut flowers all summer long.

HARDY PHLOX — The Perennial Phlox are permanent, hardy as oaks. Require no protection, no petting, no coaxing. Free from disease and insects. Have immense heads of blooms of the most brilliant and delicate colors, which are produced in continuous profusion until cut down by severe freezes. Ordinary garden soil is all that is necessary. They are indeed the glory of the summer garden. We offer strong, heavy plants for immediate blooming. Our list is the best now known.

F. E. RIDESMAID — White with red eye.

Hardy Phlox

We have no more satisfactory flowering plants than Hardy Perennial Phlox. Once planted they are permanent, Hardy Phlox.

Oriental Poppy

Papa Ver (Poppy) Oriental — These are the regal representative of this popular genus. No plant is more brilliant in late spring or early summer than the Oriental Poppy, with its large flowers, silken petals and flaming colors. Whether planted singly or in masses their large flowers and freedom of bloom render them very conspicuous in any location. Easy of culture and a considerable range of color. F. E. RIDESMAID — White with red eye.
SEDUM (Stonecrop)
SPECTABILE—One of the prettiest erect-growing species, attaining a height of 18 inches, with broad, light green foliage and immense heads of handsome, showy, rose colored flowers; indispensable as a late fall-blooming plant.

DIGITALIS (Foxglove)—For stately and picturesque beauty it is not to be surpassed, and planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

GAILLARDIA grandiflora (Blanket Flower)—Base of petals are scarlet-crimson, bordered golden yellow. A most beautiful combination; useful in assorted bouquets; valuable for table decoration.

GYPSOPHILA PANICULATA (Baby's Breath)—A beautiful old-fashioned plant possessing a grace not found in any other perennial and attracting the eye of everyone.

HEEMERCALLIS (Yellow Day Lily) — Hemerocallis have long been favorites in our garden, and are always included in any list of the most popular hardy plants.

HIBISCUS Mallow Marvels—Improved new hardy giant flowering Marshmallows, the most free-blooming of all perennials; rich, gorgeous and hardy as an oak.

HOLLYHOCKS
The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect.

IRIS KAEMPFERI (Japanese Iris)—The magnificent Iris Kaempferi in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

GERMAN OR FLAG IRIS—The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location but asking only that the sun shine on it.

LATHYRUS (Everlasting Sweet Pea)
LATIFOLIUS—These Everlasting Peas are but little known in this country, but are great favorites in England. They are extremely showy and fine. Charming climbers for covering trellises, arbors, etc.

LIATRIS (Blazing Star or Gay Feather)—It blooms in midsummer and throws up long, narrow spikes of rich purple flowers, which last a long time.

PLUMBAGO (Leadwort) — One of the most desirable border and rock plants. It is of dwarf, spreading habit, growing 6 to 8 inches high, covered with deep blue flowers during the summer and fall.

PLATYCODON (Balloon Flower)—June to October. Large, showy, deep blue flowers. Good for rock garden and border.

RUDBECKIA ( Coneflower)—Tall growing plants blooming profusely all summer.

TRITOMA (Red Hot Poker; Flame Flower; Torch Lily).

PFITZERI (The Everblooming Flame Flower)—The free and continuous blooming qualities of this variety have made it one of the great bedding plants.

YUCCA (Adams Needles)
FILAMENTOSA—Among hardy plants there is nothing more effective and striking for isolated positions on the lawn or on dry banks where few other plants thrive.
PEONIES

The finest list in Indiana to choose from. Peonies may be planted in the Spring or Fall with equally good results. We planted an acre last Spring that were in full bloom on June 5th to 10th. They will not bloom quite as early the same season they are planted as they will the second year. We are offering varieties at prices offered in good 3 to 5 eyes that will bloom the first season. We paid much more than we ask for same. Peonies each 50c; per doz., $4.00.

WHITE

ALICE ROOSEVELT (Terry) —White, large and fragrant, center petals rosy purple, center cream, shading white.

ESTHER (Terry) —White, outer petals rose, very fragrant, like a rose, one of Terry’s best.

ELSIE LAPWORTH (Terry) —White, large, globular, outer petals tinted rose tipped white, base straw color, very fragrant.

FESTIVA MAXIMA — White, the best of all early white for cut flowers.

GOLDEN HARVEST (Rosenfield) —Medium size, pale pink to creamy white, rather dwarf, but A-1 in every respect.

PAPIVAFLORA — Cream, center white.

RED

FELIX CROUSE — Red, a leader for cut flowers, very showy. 75c each.

EMPEROR WILLIAM — Best of all reds, very fine blooms profusely, superior to Felix.

EDOUARD A N D R E — Dark red, early fine.

GROVER CLEVELAND — Deep crimson, large globular type, fringed.

GENERAL MILES (Terry) — Brilliant red, large, globular and robust.

KARL ROSENFIELD — Dark red, very fine, midseason.

LOUIS VAN HOUTTE — Dark red, very free, tall, good for cutting.

EDULIS SUPERBA — Best early pink, fine for decoration, good commercial sort.

GROVER CLEVELAND

PINK

DELICATISSIMA — Fine pink for cutting.

GENERAL SHERIDAN (Terry) — Globe; deep pink, tip white; vigorous and free. A-1.

MME. DUCEL — Salmon, rose, midseason, very fine.

MONS JULES ELIE — Pale rose, very fine, early sort.

UNNAMED — Red, pink, white, flesh or mixed at 25c each; 3 for 50c.

Scrub live stock is fast disappearing. It did not pay. Neither does Scrub Nursery Stock.
TULIPS

For those early spring blossoms that make you gasp with delight from their sudden bursting forth after the blanket of snow has scarcely disappeared, you will want a few crocus, narcissus and tulips. Our varieties are unexcelled. Get the best and have them bloom the first year.

There are no bulbs which make such a rich and gorgeous display of blossoms with so little care and cultivation as do Tulips. Their early blooming, pretty cup-like flowers, gay colors, and brilliant effects make them spring favorites.

SINGLE EARLY TULIPS—Ten different colors. Very showy. 75c per doz.

DOUBLE EARLY TULIPS—Double tulips have mammoth peony-like flowers of brilliant and varied colors, shades and markings, and being double, the flowers last much longer in bloom than single varieties. 75c per doz.

DUTCH HYACINTHS

Hyacinths are among the most popular and satisfactory flower bulbs grown. Their wax-like bell formed flowers, borne in luxuriant trusses, are of matchless beauty and also delightfully fragrant. The colors, shades, and tints are wonderfully varied, ranging from purest white, through blass, pink and rose, to deepest red. From daintiest porcelain through blues to black purple, and from cream through yellows to orange and rosy apricot. 25c each; per doz., $2.50.

CROCUS

Among the earliest to blossom in spring is this beautiful little flower, lifting its head almost before the snow has disappeared. Absolutely hardy for outdoor culture and may be used for pot culture. 50c per doz.

JONQUILS (Miniature Narcissus)— A slender and graceful species with rather small, bright yellow, sweet-scented flowers, abundantly produced on stems about a foot long, bearing a cluster of florets. 50c per doz.

PAPER WHITE NARCISSUS

The beautiful flowers are pure white, very fragrant and borne in clusters. $1.25 per doz.
KRIDER’S APPLE TREES

Apples should be planted in early Spring or late Fall. We recommend April and May for Spring planting; October and November for Fall planting throughout Indiana. The varieties we are offering cover the season from early to late. All of the varieties have been tested and we know they will prove satisfactory.

Almost any soil will suit the trees; however, best results will be obtained by planting in a rich, loamy soil. Clean cultivation, careful pruning and spraying will pay big dividends. Trees should be planted thirty-five feet apart each way, and for the first year or two the trunks of the trees should be protected from rabbits.

NOTE—We propagate our Apples from scions cut from trees that are bearing fruit. Many nurseries use scions from the nursery rows and trees raised in this manner will not bear fruit until very old. Be sure you get trees that have bearing wood grafted on them.

Apples are going to be valuable in the near future, they bring a handsome price now and when the old orchards are gone they will nearly double the price received now and a good apple orchard will be more valuable than an orange grove. True, none of us will not live to reap the benefits, but our children can not have a greater inheritance than a thrifty, bearing orchard, which will guarantee them a fine income annually. We grow forty varieties of Apple, each one having certain characteristics which render them valuable. Those marked with an asterisk (*) are most valuable in Indiana.

**SUMMER VARIETIES**

**BENONI**—An excellent early apple. Tree vigorous and upright, hardy and productive; valuable variety for home or market. Flesh yellow, tender, pleasant, sub-acid; good, core small. Last of July and first of August. We consider this one of our most desirable summer Apples, ripens over 3 or 4 weeks’ time.

**EARLY HARVEST**—Size medium, shape roundish, usually more or less oblate, smooth, bright straw color when ripe; flesh nearly white; flavor rather acid; fine. Season, July. Productive. Needs rich cultivation to be fine. Good throughout the North and Southwest.

**GOLDEN SWEET**—Medium or rather large, roundish, slightly flattened; greenish, becoming pale yellow; flesh very sweet, good, of moderate quality. The fruit is always fair, the tree a free grower, and very productive. Tender for West. August.

**LIVELAND** (Liveland Raspberry)—Color orange yellow, striped, splashed and shaded with red, showing gray dots through the color. Flesh light yellow, often stained with red; fine, tender, juicy; core medium open; flavor sub-acid, good.

**AUTUMN VARIETIES**

**CHENANGO STRAW-BERRY** (Sherwood’s Favorite)—Large, roundish, bright red and yellow; very beautiful and a pleasant Apple. A good and early bearer. September and October.

**DUCHESS OF OLDENBURG**—The best known of the Russian Apples. Succeeds everywhere, even in the North-west where most varieties fail, and yields well in all sections. Fruits large, rounded; tender, juicy, of the best quality for cooking and esteemed for dessert. Trees bear young, abundantly; very hardy. August and Sept.

**WEALTHY**—Hardy, thrifty and good bearer. Fruit medium, roundish, smooth, most covered with dark red; flesh white, fine grained, juicy; sub-acid; good quality, January. For market, desserts and cooking.

Delicious

We Sell 5 at 10 rate; 50 at 100 rate; 500 at 1,000 rate
The Krider Nurseries, Inc., Middlebury, Indiana

Krider's Apple Trees—Continued

*A Block of our Fruit Trees

**FAMEUSE** (Snow apple)—One of our finest dessert fruits. Of medium size, smooth regular, deep crimson; tender, melting, delightful flavor. The tree is vigorous and hardy, succeeds especially well in the North. November to January.

**FALL PIPPIN**—Large and when fully ripe, a beautiful yellow. Flesh is tender, rich and of good quality; especially good for culinary purposes. Tree is hardy and long-lived. September to December.

**MAIDEN'S BLUSH**—Of uniformly large size, smooth, round, beautifully flushed with red on creamy yellow ground; flesh tender, of pleasant, but not high flavor. A good market sort because of its attractiveness and the tree’s heavy crops. September and October.

**WINTER VARIETIES**

**BLACK BEN**—Fall. A beautiful Apple resembling Jonathan although larger and a deeper red; good quality and a good keeper. Tree bears young and carries full crops. This variety often bears at four years of age.

**BEN DAVIS** (American)—Late; fruit round, medium to large; skin yellow, with red stripes; flesh white, tender, juicy, sub-acid.

**BALDWIN**—Large; bright red; crisp, juicy and rich; one of the most popular and profitable sorts for any purpose. Very productive. Keeps until April.

**GOLDEN RUSSET**—Vigorous growth; medium; russet; crisp, juicy, mild sub-acid; hardy; very good; long keeper. November to April.

**DELICIOUS**—Fruit, large, nearly covered with brilliant dark red; flesh; fine-grained, crisp and melting, juicy with a delightful aroma; of very highest quality. Season, November to February.

**GRIMES GOLDEN**—Vigorous grower; large golden yellow; juicy, sprightly sub-acid of high quality. Tree vigorous; a heavy bearer. Keeps until April.

**JONATHAN**—A beautiful red apple, highly flavored and of excellent quality; being tender, juicy, spicy, and rich—a splendid family sort and highly profitable for market. Tree long-lived, productive, and an early bearer. November to April.

**MAMMOTH BLACK TWIG**—The tree is a strong grower, a regular and abundant bearer. A good winter apple. Deep red; sub-acid; very highly flavored. Keeps until late spring.

**MCINTOSH RED**—Season—December and January. Tree vigorous with spreading head; a good annual bearer. Fruit above medium to large, highly perfumed; smooth polished yellow, almost covered with brilliant solid crimson; a beautiful fruit; flesh snow white, crisp, very tender, sprightly, aromatic sub-acid; very good quality.

**NORTHERN SPY**—Large roundish-conical, often flattened, slightly ribbed, handsomely striped with red; flavor rich, aromatic, mild sub-acid, fine. To afford fine fruit, tree must be kept thrifty by good cultivation. A fruit of the highest quality, and profitable for market. December to April.
Krider’s Apples—Continued

**McIntosh Red**

**NORTHWESTERN GREENING**—Season, December to March. Tree vigorous grower, hardy, fruit large; green, becoming yellowish-green when ripe; flesh yellow, fine grained and firm; flavor a good sub-acid; very smooth and attractive. One of the best growers we have in the nursery, and in the orchard is very prolific and regular when mature.

**RAMBO**—Medium, flat streaked red and yellow; very tender, juicy and fine flavored. Tree an upright grower, hardy and productive. October to December.

**RHODE ISLAND GREENING**—Season, December to March. Fruit large and handsome smooth dark green overspread with yellow. Flesh tender, rich, rather acid, but highly flavored and excellent. Has long been popular in the Eastern states as a dessert apple and also for cooking; tree vigorous, spreading; heavy and constant bearer after reaching maturity.

**ROME BEAUTY**—Large, roundish, very slightly conical; mostly covered with bright red on pale yellow ground; flesh tender, not fine grained, juicy, of good quality. Ripens early in winter. This large size and beautiful appearance of this Ohio apple render it popular as an orchard variety. Attains highest perfection on medium soils—land neither too rich, nor too poor.

**SPITZENBURG**—Esopus. Medium to large; deep red, high flavored; valuable for commercial purposes. November to April.

**STAYMAN’S WINESAP**—Most profitable market variety. It has large size, bright red color, great productivity and best quality to commend it. The tree is a vigorous grower, is irregular and drooping in habit, and adapts itself readily to different soils and situations. Drought resistant. Season, November to February.

**STARK**—Large, roundish; golden green, with crimson shadings; flesh yellow, moderately juicy, mild sub-acid. The tree makes a strong growth, bears early and abundant regular crops. One of our best Apples. January to May.

**TALMAN SWEET**—Season, December to March. Tree of vigorous, upright, spreading and very productive. Fruit above medium: whitish-yellow, often with a faint blush on sunny side; flesh white, firm moderately juicy, fine grained rich and sweet; quality excellent.

**WAGENER**—Deep red; medium to large; flesh firm; sub-acid, well flavored. Bears young and yields good annual crops. December to March. More suitable for southern than northern Michigan.

**WOLF RIVER**—Season, October to January. One of the largest Apples grown. Color yellowish-green with stripes and splashes of carmine; flesh nearly white, firm and rather coarse grained; flavor sub-acid, to good. Tree vigorous.

**WINTER BANANA**—An excellent variety, which has stood the severest tests. Tree is hardy and will succeed in very cold climates, its wonderful productivity will bring quicker and larger returns than any other Apple in the orchard.

**CRAB APPLES**

Prices of all varieties same as standard apples.

For preserves, jelly, flavoring, canning, Crab Apples are very good. Also their tartness is agreeable once in a while when they are eaten fresh. The trees themselves are beautiful and when loaded with the bright colored fruit, are striking. They are an ornament to any grounds and look well beside the finest ornamentals.

**HYSLOP**—Large; dark crimson, with bloom; very showy. Tree very hardy; late.

**TRANSCENDENT**—The largest Crab Apple. Red; showy; excellent. September to October.

**RED SIBERIAN**—Large, red-striped. Fine for cooking; very hardy.

**YELLOW SIBERIAN**—Beautiful glossy yellow, shaded bright red; good size, clear, tart. October.

For Those Who Realize the Value of Quality
In planting a Cherry orchard care should be taken not to plant the trees too close together; select a dry soil for the Cherry, as a rule, although it is so hardy a tree that it will thrive in a great variety of soils, yet a good sandy, or gravelly loam is best. Use same care in planting as other trees.

Orchardists are resorting more and more to the planting of varieties of Cherries that are strong pollinizers. Experience seems to demonstrate that such varieties as Black Tartarian, Bing, and Schmidt’s Bigarreau are the best varieties to use for this purpose. Usually about one in every ten trees has proven to be the right proportion to use of these pollinizers.

DUKE AND MORELLO (Sour)

DYEHOUSE—This variety partakes both of the Morello and Duke wood and fruit. A very early and sure bearer; ripens a week before Early Richmond, is of better quality and productive. Free. May and June.

EARLY RICHMOND—Everywhere the most popular. Tree strong, thrifty grower, making a large symmetrical head; fruit medium size, dark red, melting, juicy; sprightly acid flavor and especially valuable for cooking purposes; tree an early and abundant bearer. Season last of May and first of June.

LARGE MONTMORENCY—A fine, large, light red Cherry of the Richmond class, but larger and more upright grower, equally hardy and productive. Second only to Early Richmond in value. Ripens ten days later.

MAY DUKE—A large, light red cherry of most excellent quality. They are between a sweet and a sour cherry. Fine for canning. The tree is a strong, upright grower.

ENGLISH MORELLO—Medium to large, roundish; dark red, nearly black when ripe; flesh purplish-red, mealy, juicy, slightly astringent and good; very productive. August.

SWEET VARIETIES

BING—This grand new black Cherry was originated by Seth Luelling, of Milwaukee, Ore. Almost as large again as the Black Republican; flesh very solid, flavor of the highest quality; tree thrifty, upright grower, very hardy and productive; a fine shipping and market variety. First of July.

BLACK TARTARIAN—Very large; bright purplish black; half tender; juicy, very rich. Tree a remarkably vigorous and erect grower, and an immense bearer. One of the most popular varieties in all parts of the country. June.

WINDSOR—Tree upright, and a rapid grower; fruit large, roundish, oblong; very firm and juicy; flesh pinkish and sometimes streaked; quality very good; a productive bearer; has attracted attention owing to its large size and dark color; almost black. July.

GOVERNOR WOOD—Large, heart shaped; light yellow, marbled light red, juicy, sweet and rich. Tree vigorous productive; forms a round head. An old variety that is still a favorite in many regions.

NAPOLEON OR ROYAL ANN—A beautiful cherry of large size; pale yellow with bright red cheek; flesh firm, juicy and sweet; one of the best for market and canning.

SCHMIDT’S BIGARREAU—The fruit is of very large size, of a deep mahogany color. The flesh is dark, tender, very juicy, with a fine flavor. Fruit grows in clusters. It is an excellent shipper. July.

We Sell 5 at 10 rate; 50 at 100 rate; 500 at 1,000 rate
CHOICE PEACHES

Price of Peach Trees Each 10 100
No. 1 4-6 ft. $0.25 $2.00 $18.00
No. 1 3-4 ft. 20 1.50 15.00
No. 1 2-3 ft. 15 1.20 10.00

The Peach holds a place second only to the apple in the United States. It ripens over a long period and with proper selection of varieties a succession of fruit may be had throughout the Summer and early fall. In a general way it may be said that the standard varieties of Peaches have a wider range of adaptability than the majority of apples and thrive on thinner soils: for example: Elberta is the leading variety in all the Peach growing sections of the country—but no single variety of apple trees occupies the same position in its class as does Elberta. This fact is ample proof of the adaptability of the Peach.

PARADICHLOROBENZINE—A sure cure for the peach borer. This remedy can be purchased from your druggist. If applied in September the following directions should be followed:

Remove the dirt from about the tree in a circle of 12-inch radius, apply paradichlorobenzine in a circle about 4 in. from tree using a tablespoon to a 5-year tree to cover by mounding the dirt about the tree. The gas resulting from this preparation is a sure cure for the borer and will prolong the life of a peach tree 5 years.

EARLY AND MID SEASON VARIETIES

BIG RED (Free Stone)—Larger than Elberta. Rich red all over, flesh yellow, rich, fine grained and juicy. Stands shipping well. Tree hardy, vigorous grower, having large spread. Ripens middle of Sept.

CARMAN—In this new, hardy, rot-proof Peach, almost as large and fine as the Elberta itself, we have a Peach of great market value; a large, roundish Peach, with pale yellow skin, red blush on sunny side; white flesh; tender and melting; rich, sweet and superior flavor. A big, early, yellow-skinned Peach of high quality is sure to be in great demand. August.

CHAMPION (Free)—Large, round quite regular; yellowish-white, mottled with red on sunny side; flesh white with red at the pit; one of the best in quality. For nearby market and home use it is the best variety we know of. A good healthy grower and hardy in fruit bud. Fruit ripens from 20th of August to first of September.

CROSBY (Free)—Medium to large, orange-yellow splashed with red; flesh yellow, juicy and sweet; quality good. August and September.

CRAWFORD’S EARLY (Free)—Large, roundish, bright yellow with red cheek; flesh yellow, juicy and sweet; quality good. August and September.

EARLY ELBERTA (Free)—Larger than Elberta, though identical in form; bright yellow with red blush; flesh yellow, finer grained and sweeter than Elberta; ripens a week to ten days before Elberta; good shipper. Tree strong grower, hardy, good bearer. Last of August.

We Sell 50 at 100 rate; 500 at 1,000 rate
ELBERTA (Free) — The great market Peach perfectly hardy in the North and is believed to be the best all around Peach; color lemon-yellow with blush on sunny side; flesh pale yellow, tender and juicy; tree vigorous; a good shipping Peach. September.

J. H. HALE (Free) — Fruit averages one-third to one-half larger than Elberta; ripens about five days earlier and is much superior in flavor. Color a beautiful golden yellow with deep carmine blush. Seems to do well over a wide range of territory. It is well worth planting. September first.

KALAMAZOO (Free) — Medium to large, oval, yellow striped with red and a thin bloom; flesh yellow, red at the pit, rich, vinous and of good quality. A valuable sort. September first.

LEMON FREE (Free) — Large, roundish, often with pointed apex; light yellow with greenish-white tinge and thick bloom; flesh yellow, tender and good; a good canning sort. September.

SOUTH HAVEN — The great hardy peach for cold regions, stands 10 degrees colder weather than any other peach grown. Large, yellow, free, stone. Large as Elberta and a week earlier on the market. Of all peaches for Indiana markets, this rules supreme. Plant for commercial purposes. South Haven, Elberta, J. H. Hale. All yellow, all free stone, all money makers.

KRIDER'S LATEST

JAPAN DREAM — This is the earliest freestone Peach grown in Indiana. Very sweet, tender and excellent flavor; ripens before Champion. Brought to northern Indiana by Mr. D. A. Davis. We only have a limited number and offer them at 75c each; 5 for $3.00. Not more than 5 to a customer.

LATE RIPENING

CRAWFORD'S LATE (Free) — Large, roundish oval, yellow with broad red cheeks, flesh yellow with red at the pit; melting, vinous and very good. Late September.

GOLD DROP (Free) — The almost translucent golden colored flesh of this Peach renders it exceedingly attractive in market, where it sells at highest prices. The tree is hardy and bears early; profitable. Late September.

HEATH CLING — Very large flesh white, juicy and melting. Good keeper and shipper. Ripens in October.

SALWAY (Free) — Large, roundish, deep yellow with rich red cheek; flesh yellow, firm and juicy; sugary; a valuable late market sort. First of October.
For Those Who Realize the Value of Quality

STANDARD PEARS

The home orchard is not complete without pears and they are a very profitable commercial crop in nearly all parts of the country. Pears will live on a variety of soils, but succeed exceptionally well in a hard clay soil. Till ing and fertilizing are advisable to a certain extent, but should not be carried far enough to produce too vigorous a growth. The quality of the pear is much improved by picking before maturity and by proper ripening indoors.

BIG PROFITS ARE REALIZED FROM PEAR ORCHARDS. OUR TREES PRODUCE FIRST GRADE FRUIT

EARLY VARIETIES

BARTLETT—Large size, with beautiful blush next to the sun; buttery, very juicy and high flavored; tree a strong grower and a young and abundant bearer. August and September.

CLAPP'S FAVORITE — Large ovate; skin thin, pale yellow, marked with crimson and fawn colored dots, flesh white, fine grained, juicy, sweet, vigorous, upright buttery, rich and melting, very vigorous, upright grower. September. Very desirable in all sections.

SECKEL (Old Fashioned Sugar Pear) — Our most highly flavored Pear. Fruit small, yellowish brown, with a russet-red cheek; flesh very juicy, melting, aromatic, with a rich spicy flavor; quality very best.

FLEMISH BEAUTY — One of the best varieties of pears on account of its hardiness. The tree is a strong grower, an annual and abundant bearer, and is usually successful over a large range of country. The fruit is large; the skin pale yellow; the flavor is sweet and melting. Ripens in September and October.

WINTER PEARS

GARBER—Equally as hardy as Le Conte or Kieffer; of same class of Pears. The growth and appearance are very much like Kieffer; ripens one month sooner and of better quality.

LINCOLN CORELESS — Originated in Lincoln County, Tenn. Fruit very large, handsome appearance, good quality and very few, if any, seeds. Almost clear of core and seeds, whence its name. One of the best keepers among Winter Pears. Golden yellow; tree a good grower and very productive. Has never been known to blight.

KIEFFER'S HYBRID — Originated near Philadelphia. Supposed to be a seedling of a Chinese Sand Pear crossed with the Bartlett. Size large, very handsome; skin yellow with a bright vermillion cheek; very juicy, with a musky aroma; quality good when ripened to perfection. Rather coarse grained, but one of the best Pears for canning or preserving. As near blight proof as a Pear can be called.

DUCHESS D'ANGOULEME—A most dependable cropper, often fruiting the first season after planting. Fruit large, frequently weighing a pound. A dull greenish yellow, spotted russet, flesh white, rich and good quality. An all around profitable market pear. Oct. and Nov.

SHELDON—A large, round, russet and red pear of very rich fine quality, melting and delicious. Tree vigorous, bears well. October.

Krider Nurseries, Inc., Middlebury, Ind.—Your bundle of trees arrived in fine shape. They were packed fine. Yours truly, Edwin B. Seward, Tres Piedras, N. Mex.
PLUMS

Plum pudding, yum, yum, plum preserves and plum pie. Do you have them in your house? Would you if you grew your own plums? Why not? A plum tree is hardy. Takes little room and produces abundantly.

No other fruit tree, unless it is the cherry, will produce more abundantly than a plum tree. Although they will yield crop after crop despite neglect, plum trees will readily show the result of care and modern methods of fruit growing. The commercial side of plum production has received much attention in late years but the supply still falls far short of the demand. In general, plum trees thrive best in a sandy or clayey soil. A distance of 16 to 18 feet apart is considered the best for plum trees with the distance increased to 20 feet where a wagon spraying outfit is used. Many varieties of plums produce so abundantly that the best results will be obtainable only by careful thinning. If allowed to grow naturally the trees will be weakened and the quality of the fruit will be inferior. We can recommend to the planter the following varieties:

**Price of Plum trees**

No. 1, 5-7 ft.,
Each, 75c; 10, $7.00; 100, $60.00.
4-6 ft., 50c each;
$4.50 for 10.

**ABUNDANCE**

A nearly pinkish red plum; ripens in midseason. Thrives everywhere. A regular and heavy bearer. No orchard is complete without it.

**BRADSHAW**—A very large and fine early plum, dark violet red juicy and good. Trees erect and vigorous; very productive; valuable for market. The quality is excellent, and it is destined to become one of the most popular of all plums for canning, while its attractive color, good quality and shipping properties will cause it to be sought for as a market variety.

**BURBANK**—Adapted to any soil and climate where any other Plum is grown. A profitable commercial Plum. Requires little care. Ripens in midseason.

**LOMBARD**—Medium; violet-red; juicy, pleasant; adheres to stone; valuable market sort; hardy; productive.

**MONARCH**—Frut dark purple, covered with a thin bloom; large size specimens measuring six inches in circumference; flesh pale greenish yellow, parting freely from the stone; juicy, with a pleasant flavor. A leading market sort. Vigorous grower. September.

**MOORE'S ARCTIC**—Small, purplish black, juicy, sweet, immense bearer; one of the hardiest in bud and bloom. Sept. Excellent for home use.

**REINE CLAUDE**—Small; yellow green flesh pale green, melting, luscious and of best quality. Mid August.

**SHIPPERS PRIDE**—Large and handsome, dark purple; quality fine, juicy and sweet; excellent for canning. September.

**SHROPSHIRE DAMSON**—One of the favorite Damsons. Fruit oval; tree a good grower and enormously productive; fruit of medium size produced in thick clusters or groups, dark purple color, esteemed for preserving. October.

**WICKSON**—Large, heart shaped; dark red, thick bluish bloom; flesh yellow, solid, mealy, sweet, cling; growth upright.

**YELLOW EGG**—Very large, egg-shape. Color creamy yellow, flesh yellow and of fine quality. A good variety for the Middle West. Ripens end of August.
SELECTED GRAPES

Why not set a vineyard this Spring? No fruit yields greater returns on the investment than Grapes. Prices the past year have been from 5 to 6 cents per pound and returns have been as high as $600.00 per acre. Give that boy a chance. Set 8 feet apart in rows 10 to 14 feet wide. About 600 vines will set an acre.

Price No. 1 vines, each 15c per doz., $1.50; per 100 $10.00. All vines heavy, two years old. Except Niagara and Concord.

RED VARIETIES

AGAWAM — Bunch large shouldered; berry large, reddish brown, tender, vinous and of excellent flavor. Very vigorous and productive and one of the best of its class.

BRIGHTON — Bunch large shouldered; berries medium to large, round dark red, tender, very little pulp, sweet, juicy, slightly aromatic and very good. Ripens early.

CATAWBA (Red) — Bunch medium shouldered; berries large, deep coppery-red, becoming purple when ripe; flesh somewhat pulpy, juicy, sweet, aromatic and rich; one of the latest. Does not ripen well in the North.

DELEWARE — The bunches are small, compact, and sometimes shouldered; berries are small with thin but firm skin; flesh juicy, very sweet and refreshing and of the best quality for both table use and for wine. Ripens with Concord or a little before; vine is hardy, productive and a moderate grower.

SALEM — Bunch large and compact; berry large, of a light chestnut or Catawba color, thick skin, perfectly free from hard pulp; very sweet and sprightly with a most exquisite aromatic flavor. Good on Wines; keeps well.

WHITE VARIETIES

*NIAGARA — Occupies the same position among the white varieties as Concord among the black. Bunch and berries large, greenish white, changing to pale yellow when fully ripe. Skin thin but tough; quality much like the Concord. 10c each; $6.00 per 100.

*POCKLINGTON — Seedling from Concord. The vine is thoroughly hardy both in wood and foliage; it is a strong grower, never mildews in vine or foliage. The fruit is a light golden yellow, clear, juicy and sweet to the center, with little or no pulp; bunches very large, sometimes shouldered; berries round, very large and thickly set. Ripens with the Concord.

MOORE’S DIAMOND (White) — A vigorous grower, entirely free from mildew and a prolific bearer; bunches large and compact. Ripe about two weeks before Concord.

BLACK VARIETIES

*CAMPBELLES EARLY — A new, very large and fine early black Grape. Strong, vigorous hardy vine with thick, healthy leaves; clusters very large, usually shouldered, compact and handsome; berries large, nearly round, black, rich, sweet, very good; skin thin; seeds few and small, parting easily from the pulp; good shipper; ripens about two weeks before Concord; keeps well. This makes it one of the most satisfactory and profitable market sorts to grow.

*CONCORD — One of the most popular and reliable varieties we possess; bunch large, compact and shouldered; berry large, round almost black with blue blooms, juicy, buttery and very sweet. 10c each; $6.00 per 100.

MOORE’S EARLY — A large Grape, ripening a week earlier than Concord; good grower; berries large, good quality, and makes a moderate yield; very valuable as an early Grape.

WORDEN — Seedling of the Concord which it greatly resembles in appearance and flavor, but the berries are larger. The fruit is said to be better flavored and to ripen several days earlier. These qualities will give it the foremost rank among native Grapes.

NOTE — No discount for early orders on Niagara or Concord.
RASPBERRIES

Loose soils produce the best Raspberries. Partial shade is no hindrance to productiveness, as the natural habitat of the Raspberry is in lower ground, filled with leaf mold and partly shaded. For this reason along higher fences and in between the young orchard trees, Raspberries are likely to thrive. Allow not more than five good canes to develop to the plant, and pinch out the tops of these when they attain a height of 2½ to 3 feet in order to encourage laterals.

Both pink and black Raspberries are sold only in bunches of 25 plants. Less than this number is hardly worth the trial.

BLACK VARIETIES

Per 25, 30c; per 100, $2.00; per 1000, $20.00 (Except Quillen).

CUMBERLAND—Largest black Raspberry known; unusually strong grower, perfectly hardy. The most profitable Raspberry grown.

GREGG—Extra big, enormously productive. Hardy; firm black meaty berries. Late ripening and firm for shipping.

KANSAS—Originated at Lawrence, Kans. Healthy, vigorous grower; early; berry is as large as Gregg and as good a shipper. Very productive and valuable for early market.

QUILLEN—This variety originated a few miles south of Indianapolis and has proven to be more disease proof than other varieties of blackcaps. The largest and most prolific of all blackcap varieties; a cross between Cumberland and Hopkins. Ripens a little later than Cumberland, Kansas and Gregg. We highly recommend this variety. Per doz., $1.00; per 100, $5.00.

RED VARIETIES

Per 25, $1.00; per 100, $3.00; per 1000, $20.00. By parcel post, 15c per 50 additional.

CUTHBERT—Crimson, large, conical, firm and juicy. The canes are upright, strong and vigorous, Hardy. The standard late red market and home variety that is popular and unsurpassed.

KING RED—Bright scarlet, sweet and melting. This early red is the best of its season because of hardness, productiveness and general good qualities. Ripens two weeks before Cuthbert.

ST. REGIS—The so-called everbearing. It does produce some berries throughout the Summer, and in the Spring is an excellent producer. Quality very good.

ERSKINE PARK—Everbearing large, deep red, bears all summer, very fine flavor, good market variety.

COLUMBIAN—The Columbian is a new variety of the Shaffer type, of remarkable vigor and productiveness, propagates from tips. Fruit very large, often an inch in diameter, shape somewhat conical, color dark red bordering on purple; adheres firmly to the stem and will dry on the bush if not picked; seeds small and deeply imbedded in a rich juice pulp with a distinct flavor of its own. Succeeds wherever red sorts do well and promises to become the leading variety. A most delicious table berry. Per 25, $1.50; per 100, $5.00.

YELLOW VARIETIES

GOLDEN QUEEN—Large beautiful transparent, amber color, and exceptionally firm; very productive. The canes are of the strongest growth and quite hardy. The delicacy of flavor is remarkable, comparable only to fragrance of dew drenched wild flowers. No berry equals it for table use. Per 25, $1.50; per 100, $5.00.
FOR THOSE WHO REALIZE THE VALUE OF QUALITY

BLACKBERRIES

Blackberries do best on good soil, clay and sand mixture preferred, set in rows 6 feet apart and 2 feet in the rows. 2,500 are required per acre. Blackberries are in great demand now at 20¢ per quart. Give the boy a chance to try his mettle by letting him start a patch. He won't have any desire to leave the farm if he is successful in raising fruit. The varieties here given are perfectly hardy and will prove a source of profit. Beware of the Erie, Wilson, Jr., Lawton and their like; they will not stand our winters.

Snyder—The leading variety here; needs no protection, is rust proof and will stand more neglect than any other variety. In fact it is at its best in sod or shade. Per doz., 50¢; per 100, $3.00; per 1,000, $18.00.

Eldorado—Largest hardy Blackberry grown. Free from rust and the best money maker here. Berries of the Eldorado bring 50¢ per crate more than Snyder on the local market. Per doz., 75¢; per 100, $3.00; per 1,000, $18.00.

BLOWERS—Very large, finest flavor and jet black. Canes grow upright, perfectly hardy. This variety is one of the most productive under cultivation. Begins to ripen in July and continues late. Sells for highest market price. Per doz., 75¢; per 100, $3.00; per 1,000, $20.00.

CURRANTS

Fay's Prolific—Berry averages large, juicy and less acid than Cherry; bush not quite so strong a grower. Each, 10¢; $6.00 per 100.

LONDON'S MARKET—Bush vigorous upright; fruit medium to large; color dark red, with sprightly acid flavor; very productive. Each 12¢; $6.00 per 100.

PERFECTION—The latest introduction, being a cross between Fay's Prolific and White Grape, combining the best qualities of both. Berry bright red and large. The clusters average longer and the size of berry is maintained to the end of bunch. In quality it is said to be superior to anything in the market today, being a rich, mild sub-acid flavor with plenty of pulp and few seeds. Each 15¢; $10.00 per 100.

RED CROSS—One of the later introductions. A strong growing variety with long clusters. Berry medium to large. Bright red. Of mild and pleasant quality and fine flavor. Each 10¢; $6.00 per 100.

BLACK NAPLES—Large, black, rich, tender; excellent for jellies and wine; very productive. Each 20¢; $15.00 per 100.

BLACK CHAMPION—A variety from England. One of the best black currants yet introduced. Bunches very large, excellent flavor, strong grower and very productive. Each 20¢; $15.00 per 100.

WHITE GRAPE—Bush vigorous, somewhat spreading, productive; clusters long; berries large; of very attractive color, mild flavor and good quality; a good table variety. Each 20¢; $8.00 per 100.

GOOSEBERRIES

This fruit is very useful for cooking either green or ripe, and is used for canning extensively. Requires the same cultivation and treatment as currants. The surest method to prevent mildew is to plant thickly in the rows and mulch deeply, six or more inches, with straw, tan bark, coal ashes, etc. Plantations thus treated have borne large crops for twenty years. The mulch retains moisture in the driest weather; the few weeds that push up are easily pulled, and the fruit is large and more evenly ripened. Price all varieties except Chautauqua. Each 20¢; $10.00 per 100.

DOWNING—Fruit large, round, light green with distinct veins, soft, juicy and fine flavored; vigorous and productive; smooth skin; one of the best.

HOUGHTON—Medium size, pale red, sweet and juicy; vigorous grower, abundant bearer and free from mildew.

CHAUTAUQUA—Light yellow, largest size; 1 to 1½ inch in diameter; very sweet and delicious, 50¢ ea.
EVERBEARING STRAWBERRIES

We have been growing Everbearing Strawberries for 12 years and have tried 12 varieties. We have eliminated all but one. This has given excellent results. It will yield as much as the common varieties in June and will produce well all Summer and Fall.

MASTODON, the Marvelous Everbearer

The reports we have from the actual growers of Mastodon sound almost unbelievable. Had we not seen field after field of this wonderful berry in bearing we would hesitate to tell you of its incredible productiveness.

We have seen, mind you, seen fields producing crate after crate of berries the size and color of which would astound you. Often 18 to 24 berries would fill a quart box. This was happening in July, August, September and October, when berries bring a price of 35c to 40c per quart on the market. An acre will produce the first season from 200 to 400 crates, not quarts, per acre.

You might think that berries of such size might be inferior in color and flavor. Not so. Many of our patrons have exclaimed at the fine flavor and rich color of these berries, even in October and November. A short cake at Thanksgiving is not unusual for the heavy foliage protects the berries from even hard frost.

Plant this berry for commercial use. It is the greatest fall money maker. We think that after this year we will catalog no other everbearer. That is our opinion of it.

Our stock came direct from the originator. In fact he brought us the plants himself in his Ford auto. Therefore, we know that your plants are genuine unmixed Mastodon. Special price while they last. 50c per doz., $2.00 per 100; $15.00 per 1000.

The Krider Nurseries:

"I have received the Strawberry plants and they were very nice and in good condition. Enclosed find check for $21.00, the price of the Strawberry plants as listed in your catalog. Thanking you for your kindness in holding back the plants for me until the weather conditions were right, I remain,

Yours truly,

W. Scott Welch, Indiana."
"I must tell you from the 540 Dunlap Strawberry plants we got of you we picked nearly 900 quarts of berries. I don’t think we ever had a crop we enjoyed so much."

Mrs. Rose Richard, Indiana.

THE QUALITY OF STRAWBERRY PLANTS

In looking through the many catalogs you receive you will notice that many claim to be the largest grower of plants, and their plants are the best grown. We do not claim to be the largest grower of plants or that they are better than some others, but we have bought plants from some that make such claims in different parts of the country and have never received any better than we send out. In some cases we had to throw away half of the plants as they had the crowns broken or were so small that they were not worth planting. We guarantee the plants we send out to be as large and as fine as you get anywhere (no matter what you pay), and to be put up in as good condition and if grown side by side under like conditions, that they will produce as much and as good fruits.

COLOR SYSTEM—We use a different color of wrap for each variety of Strawberry plants, thus assuring you an easy way of keeping the varieties separate when they are unpacked.

SPRING BEARING VARIETIES

Prices of Strawberries, 75c per 100; $5.00 per 1000. Except Dunlap and Premier See Special Prices on Senator Dunlap and Premier

AROMA (Per)—Large; dark red; uniformly roundish, heart-shaped; flesh firm and of very good quality. Stands shipping well; plants vigorous and very productive; blossoms rich in pollen and is good fertilizer for imperfect varieties. Late.

BUBACH (Per)—Very prolific, excellent flavor and large size. A number of new varieties have been pitted against it, claiming superiority in one way or another, but Bubach is among the best and continues to grow in favor.

COOPER—An extraordinary combination of size and flavor in a spring berry. Heavy bearer, due to its habit of rank foliage and deep roots. The heavy vigorous plants are often a foot in height producing great clusters of big red berries that are deliciously melting. They sell where other varieties fail. Will satisfy the finest trade. Our advice is to grow more Premier and Cooper.

DR. BURRILL (Per.)—Fruit is large, beautiful, dark red in color, and of excellent flavor. Shape similar to the Senator Dunlap and ripens at the same time as the Dunlap: great canning berry. It is an excellent berry for the home garden or for the market. No better.

GIBSON—This is the most popular Strawberry extant today. Best for market and best for home garden. Berry large; dark glossy red, nearly round, very productive. Plant Gibson and success will be yours.

SENATOR DUNLAP (Per.)—This berry is of the Warfield type, as a perfect blossom, is hardy, productive, a splendid keeper and able to hold its own under any “rough and tumble” methods of culture to which it is likely to be subjected. It is a very heavy bearer of good size even from very beautiful dark red color. Special price $3.50 per 1000.

PREMIER (Per.)—This new variety has in the space of a few short years, become the most popular early Strawberry known. Until the advent of the Premier it seemed almost impossible to find an extra early Strawberry that was satisfactory in every way. The main qualifications for a good profitable Strawberry was lacking. Either they were too soft, ripened with green tips, were of poor color and quality, or the berries became small in size after two or three pickings.

All of these faults are now eliminated in the Premier. While it is the first variety to ripen it is of long fruiting season, and holds its size and uniformity to the last picking.

Berry has a rich, glossy appearance, being of a bright red clear through to the heart. It is slightly tart in taste and of such firm texture that it carries well to the most distant markets. Added to these qualifications its large and generally attractive appearance make Premier a variety so sought after in all markets.

It is a strong pollenizer, vigorous grower and heavy producer. Being easy to grow it is one of the safest and most profitable Strawberries to plant, assuring one of success.

SPECIAL PRICES $4.50 PER 100

We Sell 50 at 100 rate; 500 at 1,000 rate
APRICOT TREES

Ripening as it does between Cherries and Peaches, usually about the month before the early peaches, the Apricot is a most welcome fruit, tempting and delicious. No garden should be without a few trees. In addition to its value as fresh fruit it is a superior fruit for canning and drying, vast quantities being used for these purposes every year. There is always a market for Apricots at good prices, and the planter need have no fear of over production.

Prices of all varieties of Apricot trees
Each 10
Largest size 2 yr. 4 to 5 ft. ... $ .75 $7.00
Medium size 2 yr. 3 to 4 ft. ... .60 5.00

ALEXANDER—Russian, an immense bearer. Fruit large, oblong, yellow, flecked with red; sweet and delicious.

BUDD—Russian. Large, white with red cheek; sweet and juicy; strong grower, good bearer, Late.

GIBB—Russian. Medium yellow, sub-acid, rich and juicy, the best early sort.

MOOPARK—One of the largest and finest Apricots, Yellow with red cheek. Flesh orange, sweet, juicy and rich; parts from the stone. Very productive.

SUPERB—Russian. Medium, roundish oval, smooth, light salmon with numerous red or russet dots, flesh yellow, firm, sub-acid and good; tree hardy and productive; middle of July.

QUINCES

Quince trees can be planted on low, damp, heavy soils where other fruits do not thrive. They require very little attention and are very profitable for market. No home garden is complete without a few Quince trees.

PRICE OF QUINCE TREES
2-yr., 4 to 5 ft. ............... Ea. 75c; doz. $8.00
2-yr., 3 to 4 ft. ............... Ea. 60c; doz. 6.00

CHAMPION—Good bearer; very large; good keeper; very productive. Bears extremely young.

ORANGE (Apple)—Large; bright golden yellow; excellent flavor. Fine for domestic use. October.

ASPARAGUS

The first garden vegetable of Spring; it is a great delicacy and comes in just when it is most needed. One hundred roots will supply a small family and will last for years. Set the plants about eighteen inches apart in the row. Spread the roots out in the bottom of the hole or furrow and gradually fill in as the plant grows, so that the roots will be about four inches deep.

Rhubarb

VICTORIA—The old standard variety, large stalks; medium season. Per doz., $1.00; per 100, $5.00.

LINNEAUS—One of the leading varieties grown here. Stalks not as large as Victoria, but earlier. Per doz., $1.00 per 100, $5.00.

MILLER’S CREAM—For many years an old market gardener near Bristol had the early trade of Elkhart on pie plant; he had the largest, earliest and the best flavored pie plant that came to the city. First made from it had the flavor of peach and it was called peach flavored. Since his death we have succeeded in obtaining the entire stock and have at this time 10,000 stalks. We are offering this to our customers at the same price as the common kind. Be sure and send for a dozen of this variety in your order. We call it “Miller’s Cream” and will give $25.00 for a dozen stalks that will excel it in size, season and quality.
LANDSCAPE SERVICE

Send in a drawing of your house and yard showing walks and drives and we will submit you a plan. For this service you send us $5.00 and when you order this will be deducted from the amount of your bill provided it amounts to $25.00 or more. On pages 44, 45 and 46 we list some of our more rare plants for landscape work.

A TWO-FOLD OBJECT

Landscaping has a two-fold object—beauty and utility. The plan must provide for pleasing views, beautiful foliages and charming flowers, the whole making a harmonious picture. It must also provide for convenient walks and drives, ease of handling, and, not the least important, economy of space.

Everyone has noticed the common way of breaking up the open, grassy spaces and spotting them with individual shrubs and flowers of all kinds, of laying out drives and walks with useless crooks and turns, with no attempt to shut out unsightly objects. These common errors will be avoided by the use of a well defined plan. As a matter of fact, it is just as bad to set out grounds without a plan as to begin building a home the same way. It is not necessary to do all the planting at one time, or in one season; the owner may complete the plan at his own convenience.
Unusual Evergreens and Shrubs

Each year taste in Landscaping changes just as Styles in Wearing apparel or Automobile designs change. It is Krider's careful effort, each year, while offering all the tried and true in fruit and shrubbery and flowers to give to the public the newer things that are unusual. Extreme care is taken not to select plants that will not thrive in our shipping radius. Kriders must know that the plants they offer will not only be objects of beauty but that they will be hardy and will do well for their customers. In other words we offer only those new plants that we know will grow and be a joy to you.

RHODODENDRONS—Those of you who have noticed the plantings in Cleveland and other cities in the North and East during the last five or six years will have noticed the large number of homes landscaped with Rhododendrons and Azelas. These beautiful broad leaved Evergreens need no lengthy description. The exquisite beauty of the plant and the delicate shading of the masses of orchid-like blossoms, big as Peonies, appeal to every one.

Directions for planting and growing furnished free.

R. CATAWBIENSE (Catawba Rhododendron)—One of the most beautiful native shrubs and the hardiest of all the Rhododendrons. In June every branch has a large cluster of 1½ inch broad, rosy purple blooms. The foliage is the most handsome of any Rhododendron. This, like the following species, is now used extensively in park planting and taken by carloads from native woods and mountains. Dug with care, with a ball of turfy soil, it may be successfully transplanted. The handsome large evergreen foliage is pleasant to behold the year round. Clumps 1½-2 ft., $3.00 each; $25.00 per 10.

RHODODENDRON MAXIMUM (Rosebay Rhododendron)—A hardy variety, of magnificent size, making it a wonderful plant for mass effects. The luxuriant growth of dark green, narrow leaves, 6 to 12 inches long, gives a delightful atmosphere. The light pink or white flowers, 1½ to 2 inches broad, are borne in large clusters in great abundance. Flowers are produced in June and July and vary from rose-pink to purple and white. Quite as satisfactory as Catawbiense. Clumps 2-2½ in. $3.00 each; $25.00 for 10.

COTONEASTER HORIZON-TALIS (Rock Cotoneaster)—A very low growing shrub with almost horizontal branches and small very dark green leaves. Small pinkish flowers in June followed by bright red oval-shaped berries in August. Fine for the Rock Garden. Each $2.50.

EUONYMUS RADICANS VEGETUS (Bigleaf Wintercreeper)—It has been called the Evergreen Bittersweet. It is very desirable to use on any building where a low Evergreen vine is desired, with good effect at the base of masonry. The abundant fruits remain on the branches a long time and produce a beautiful effect in contrast with the leaves. Each 50c.
For Those Who Realize the Value of Quality

**Daphne Cneorum**

(Rose Daphne) — A most beautiful, low, evergreen, hardy shrub and always a favorite. The pink blossoms nesting among the green leaves in the month of May are very attractive. It often blossoms in the late Fall and early Winter also. For rock gardening and in front of other choice Evergreens, it is well adapted.

Each $2.00.

**Rhododendron Catawbiense**

AZALEAS — No woodland development where rhododendrons and laurel are used extensively is complete without the introduction of the Azalea. Azaleas are rather slow growers, however, instead of becoming leggy and unsightly as the years go by (which is usually characteristic in some shrubs), the become more attractive, furnishing larger and larger display of bloom as they mature, eventually growing into large specimens and becoming real landmarks that money could not replace.

**Mollis** — A beautiful species recently brought from Japan; it has fine, large trusses of flowers in shades of pink and yellow, ea., $3.00.

**Kalmia Latifolia** (Mountain Laurel) Kalmia — One of the most beautiful Evergreen shrubs. Grows to a height of 8 feet, with broad-glossy green foliage. In June rose-colored flowers of elegant shape appear in large and showy clusters at the end of the shoots. Few broad-leaved Evergreens are so beautiful for lawn plant or with Rhododendrons in flower. It is fine as a single or other shrubs. Once proposed as the national emblem. Each $3.00.

**TAXUS CUSPIDATA** (Japanese Yew) — A slow growing small tree or shrub entirely hardy. Its dark green foliage is maintained in good color through the Winter.

**TAXUS CUSPIDATA BREVIIFOLIA** (Dwarf Japanese Yew) — A dark green shrub of rich and handsome appearance; typically Japanese. Its spreading branches, thickly covered very short dark green leaves, are well adapted to trimming formal effects. 2-3 ft., $3.00.

**Berberis Thunbergi Atropurpurea** (Red Japanese Barberry) — This shrub fills a long felt want. Since Wheat rust attacked this country and all Purple and Common Barberries had to be cut out, there has been a great demand for a new type that would satisfactorily take the place of the old Purple Barberry. We offer the new Red Japanese and guarantee that if it is placed in a position of plenty of sun it will do as well as the old time Purple.

Red Japanese Barberry may be used for the shrubbery border, or clumps, or even as a specimen shrub. The color is a rich bronzy red similar to the best of the Bloodleaf Japanese Maple. It is like the Japanese Barberry in all other respects, attaining its beautiful orange and bronze coloring in fall, and bearing the same profusion of bright red berries in winter. Each 1 yr. 50c; 2 yr., 75c.
CONSULT OUR LANDSCAPE DEPARTMENT

We make it easy for you to have beautiful grounds and gardens. Our Landscape Department will draw the plans you need. Read page 43 for details.

JAPANESE WALNUT

We have a few Japanese Walnuts. We are going to catalogue them here, although we will not have enough to go around. First come first served. Don’t be disappointed if you get one of these coming nut trees.

They are six years old, five to seven feet high and extra heavy stock. Lots of roots to insure quick growing and bearing very hardy.

Nut trees are becoming scarcer each year. Add to the value and attractiveness of your farm or city lot by setting one of these. Each $3.50 while they last.

KOLKWITZIA AMABILIS

The following description is from a bulletin of the Amor Arborvitae. You can judge the desirability of this new introduction from this description.

Kolkwitzia Amabilis is now in blossom on Bussey Hill, where a young and vigorous plant is flowering. Every succeeding year emphasizes the garden value of this plant for which the descriptive title of Beauty-Bush has been aptly coined.

It is a twiggy shrub, growing from 6 to 8 feet tall, with the inner stems erect or ascending and the outer ones arching to the ground, the whole plant forming a dome-shaped mass. The flowers are produced along the whole length of the branches in clusters at the ends of short, leafy shoots. They are tubular with a gaping mouth, deep pink without, stained with yellow-brown on the lower throat and lip.

The graceful habit of the plant, its free-flowering qualities, pleasing color, combined with perfect hardiness, makes this one of the most beautiful, as well as the most useful shrubs that China has given to the gardens of this country. Related to the Weigelas or Diervillas, it is far more beautiful than any of them, and is destined to become one of the most familiar plants in our gardens.

Price 2 yr. plants, $1.00 each; 3 for $2.50.

Creating civic pride in any town or community is regarded as one of the duties and clubs are working in every city to secure the proper spirit in its citizens. But what better place can we start than by giving our growing children surroundings of refinement and culture and beauty. They are at the impressionable age. Very few schools now-a-days but what are being landscaped.
QUALITY PAYS

In buying any article there is a limit below which first-class goods cannot be sold. A pair of shoes may be bought, for instance, at a price anywhere from $2.00 up to $15.00. Now somewhere along the line a good all leather shoe can be purchased for $5.00 or $6.00. Above that you pay for style, and finish. Below that the quality must be cut, cheaper leather, or paper filler, that keeps the shoe from giving full service.

So in Nursery Stock. There is a price for good vigorous, sturdy stock. Below that price quality must be sacrificed.

Now the difference in cost between a poor tree and a cheap tree is only a few cents. For instance a No. 1—3 year old apple tree is $40.00 per 100 or 40c each. Perhaps you might buy trees for 25c each, a saving of 15c; but if the 40c tree will bear a crop a year sooner and, being larger and better, will bear more fruit, is it 15c saved?
